Spanish Newsletter, 1964 *Computational Linguistics and Intelligent Text Processing* Alexander Gelbukh, 2004-03-08
CICLing 2004 was the 5th Annual Conference on Intelligent Text Processing and Computational Linguistics see www.CICLing.org CICLing conferences are intended to provide a balanced view of the cutting edge developments in both theoretical foundations of computational linguistics and the practice of natural language text processing with its numerous applications. A feature of CICLing conferences is their wide scope that covers nearly all areas of computational linguistics and all aspects of natural language processing applications. These conferences are a forum for dialogue between the specialists working in the two areas. This year we were honored by the presence of our invited speakers: Martin Kay of Stanford University, Philip Resnik of the University of Maryland, Ricardo Baeza Yates of the University of Chile and Nick Campbell of the ATR Spoken Language Translation Research Laboratories. They delivered excellent extended lectures and organized vivid discussions. Of 129 submissions received, 74 full papers and 44 short papers were selected for presentation after careful international reviewing. 74 papers were selected for presentation: 40 full papers and 35 short papers written by 176 authors from 21 countries: Korea 37, Spain 34, Japan 22, Mexico 15, China 11, Germany 10, Ireland 10, UK 10, Singapore 6, Canada 3, Czech Rep 3, France 3, Brazil 2, Sweden 2, Taiwan 2, Turkey 2, USA 2, Chile 1, Romania 1, Thailand 1, and The Netherlands 1. The figures in parentheses stand for the number of authors from the corresponding country.

Comparative Evaluation of Multilingual Information Access Systems Julio Gonzalo, Martin Braschler, Michael Kluck, 2004-11-16. The fourth campaign of the Cross language Evaluation Forum CLEF for European languages was held from January to August 2003. Participation in this campaign showed a slight rise in the number of participants from the previous year with 42 groups submitting results for one or more of the different tracks compared with 37 in 2002, but a steep rise in the number of experiments attempted. A distinctive feature of CLEF 2003 was the number of new tracks and tasks that were offered as pilot experiments. The aim was to try out new ideas and to encourage the development of new evaluation methodologies suited to the emerging requirements of both system developers and users with respect to today's digital collections and to encourage work on many European languages rather than just those most widely used. CLEF is thus gradually pushing its participants towards the ultimate goal: the development of truly multilingual systems capable of processing collections in diverse media. The campaign culminated in a two-day workshop held in Trondheim, Norway, 21-22 August immediately following the 7th European Conference on Digital Libraries ECDL 2003 and attended by more than 70 researchers and system developers. The objective of the workshop was to bring together the groups that had participated in the CLEF 2003 campaign so that they could report on the results of their experiments.
