Equity Home Bias in International Finance Kavous Ardalan, 2019-05-17 This book provides a comprehensive and critical analysis of research outcomes on the equity home bias puzzle that people overinvest in domestic stocks relative to the theoretically optimal investment portfolio It introduces place attachment the bonding that occurs between individuals and their meaningful environments as a new explanation for equity home bias and presents a philosophically multi paradigmatic view of place attachment For the first time a comprehensive and up to date review of the extant literature is provided

demonstrating that place attachment is a contributing factor to 22 different topics in which variations of home bias are present The author also analyses the social psychological underpinnings of place attachment and considers the effect of multiculturalism on the future of equity home bias The book s unique approach discusses the issues in conceptual terms rather than through data and statistical methods This multi and inter disciplinary book is an invaluable resource for graduate students and researchers interested in economics finance philosophy and or methodology introducing them to a new line of research

Robust Portfolio Optimization and Management Frank J. Fabozzi, Petter N. Kolm, Dessislava A. Pachamanova, Sergio M. Focardi, 2007-04-27 Praise for Robust Portfolio Optimization and Management In the half century since Harry Markowitz introduced his elegant theory for selecting portfolios investors and scholars have extended and refined its application to a wide range of real world problems culminating in the contents of this masterful book Fabozzi Kolm Pachamanova and Focardi deserve high praise for producing a technically rigorous yet remarkably accessible guide to the latest advances in portfolio construction Mark Kritzman President and CEO Windham Capital Management LLC The topic of robust optimization RO has become hot over the past several years especially in real world financial applications This interest has been sparked in part by practitioners who implemented classical portfolio models for asset allocation without considering estimation and model robustness a part of their overall allocation methodology and experienced poor performance Anyone interested in these developments ought to own a copy of this book The authors cover the recent developments of the RO area in an intuitive easy to read manner provide numerous examples and discuss practical considerations I highly recommend this book to finance professionals and students alike John M Mulvey Professor of Operations Research and Financial Engineering Princeton University

Portfolio Selection Using Multi-Objective Optimisation Saurabh Agarwal, 2017-08-21 This book explores the risk return paradox in portfolio selection by incorporating multi objective criteria Empirical research is presented on the development of alternate portfolio models and their relative performance in the risk return framework to provide solutions to multi objective optimization Next to outlining techniques for undertaking individual investor s profiling and portfolio programming it also offers a new and practical approach for multi objective portfolio optimization This book will be of interest to Foreign Institutional Investors FIIs Mutual Funds investors and researchers and students in the field
