Building and Delivering Sustainability Solutions: Insights, Methods, and Case-Studies Nathaniel K. Newlands, Tracy A. Porcelli, Andries B. Potgieter, Louis Kouadio, Alfredo Huete, Wei Guo, 2019-10-18
Sustaining ecosystems to deliver what people need and value while mitigating and adapting to global climate change and extreme event impacts presents a complex set of environmental, economic, and social challenges in ensuring resilient and sustainable food production. The Climate Smart Landscape (CSL) approach has emerged as an integrated management strategy to address the increasing pressures on agricultural production, ecosystem conservation, rural livelihoods, climate change mitigation, and adaptation. Deploying cheaper, more accurate, and efficient technology enables the harnessing of big data for use in solving sustainability challenges. With improved integrated analytical frameworks, statistical approaches, spatially explicit models, and indices, the CSL approach can be further developed and applied for more resilient, productive, and sustainable ecosystems. This eBook brings together original research, review, hypothesis, theory, and technology report articles involving 87 authors from 9 countries across Asia, Europe, and North America. These articles present new methodological and technological innovation findings and insights across four themes: 1) landscape productivity and crop suitability; 2) variable crop requirements for water and nutrients; 3) crop health status, phenology, and phenotyping; and 4) crop disease assessment and prediction under integrated pest management (IPM).
