

**IMPORTANT:** Always use ServiceLink when attempting to diagnose problems with the AGS (Automated Gear Shift) transmission.

### How To Start

To gain a baseline for troubleshooting when there is no definite problem, when the malfunction is erratic or intermittent, or to determine the general health of the electrical system, start with the electrical pre-test in [Subject 301](#).

In a few cases there will be a definite problem and no J1587 fault code will be sent (engine will not crank, no information on gear display, fluid level fault). For these problems, see the appropriate table in [Subject 301](#).

But in most cases, the J1587 fault code is the starting point for the troubleshooting procedures. See [Table 1](#) to find information for SID fault codes. See [Table 2](#) to find information for PID fault codes.

Before starting any procedures, use ServiceLink to depressurize the AGS hydraulic system. For detailed procedures, see [Subject 160](#).

### Fault Code Guide

To troubleshoot a given fault code, look up the subject number in [Table 1](#) (for SIDs) and [Table 2](#) (for PIDs). Follow the procedures for that fault code until the fault is corrected.

| Fault Code Guide (MID 130 SIDs) |     |                              |                                                                                       |                                   |
