Children, Schools and Families Committee, 2008 Testing and Assessment Third report of session 2007 08 Vol 2 Oral and written Evidence **Child Development** Catherine S. [Steen Tamis-LeMonda (Steffie van der) Duffy, Hester), 2025 The Times Index ,2011 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement Skills for Life Great Britain. Parliament. House of Commons. Public Accounts Committee, Great Britain. Parliament. House of Commons. Committee of Public Accounts, 2009 Although the Department for Innovation Universities and Skills and its predecessor the Department for Education and Skills spent around 5 billion on basic skills courses between 2001 and 2007 9 billion by 2011 large numbers of the adult working population of England remain functionally illiterate and innumerate In 2003 an estimated 75 per cent of the adult population of working age had numeracy skills below the level of a good pass at GCSE and 56 per cent had literacy skills below this level In July 2007 the Government announced a new objective to help 95 per cent of the adult population of working age achieve functional literacy and numeracy the level of skill generally needed to get by in life by 2020 Achieving this ambition would however only raise England to the standards currently achieved by the top 25 per cent of OECD member countries There are now separate targets for literacy and numeracy which focus on achieving the functional level of skill The new targets especially for numeracy will be challenging to meet and to date far less progress has been made tackling poor numeracy skills compared with literacy skills This is not helped by the low number of numeracy teachers available Many hard to reach people with poor literacy and numeracy skills come into contact with other government services such as Jobcentre Plus the Prison Service and the Probation Service More of these people are being encouraged to take up courses to improve their literacy and numeracy skills but the percentage who participate is still relatively small The Department's biggest challenges are reaching people in the workplace who lack skills and getting employers to recognise the benefits of raising the skills of their workforce

Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow

range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate. This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics. Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers, the quality of careers advice in schools and the importance of practical science in schools.

Cuba and Africa, 1959-1994 Kali Argyriadis, Giulia Bonacci, Adrien Delmas, 2020-11-01. A history of Atlantic solidarity between Cuba and Africa in struggle for African independence from colonial powers. The Cuban people hold a special place in the hearts of the people of Africa. The Cuban internationalists have made a contribution to African independence, freedom and justice unparalleled for its principled and selfless character. As Nelson Mandela states, Cuba was a key participant in the struggle for the independence of African countries during the Cold War and the definitive ousting of colonialism from the continent. Beyond the military interventions that played a decisive role in shaping African political history, there were many-sided engagements between the island and the continent. Cuba and Africa 1959-1994 is the story of tens of thousands of individuals who crossed the Atlantic as doctors, scientists, soldiers, students and artists. Each chapter presents a case study from Algeria to Angola, from Equatorial Guinea to South Africa, and shows how much of the encounter between Cuba and Africa took place in non-militaristic fields: humanitarian and medical, scientific and educational, cultural and artistic. The historical experience and the legacies documented in this book speak to the major ideologies that shaped the colonial and postcolonial world, including internationalism, developmentalism and South-South cooperation. Approaching African-Cuban relations from a multiplicity of angles, this collection will appeal to an equally wide range of readers: from scholars in black Atlantic studies to cultural theorists and general readers with an interest in contemporary African history. Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons, 2005. **New Society**, 1985.
