Many do you think the profit margin for Anagene's cartridges has been fluctuating? Is there attributable to the actual number of cartridges sold or the change in the number of the existing system that are using the cartridge the most?

The actual number of cartridges sold has not changed. The company looked at the estimated number of cartridges produced and reduced the quantity of the cartridges per unit. This led to the estimated number of cartridges change. Finally, comparing the number of cartridges sold to the quantity of cartridges produced per unit.

Includes new information on molecular diagnostics throughout, including FISH, fluorescence in situ hybridization techniques, plus new developments in molecular biology and molecular techniques targeted to personalized medicine and immunohistochemistry. Contains more tables for quick reference, new figures that demonstrate key differential diagnostic points, and discussions of new entities as well as thorough content updates in every section.
