INVESTMENT MANAGEMENT MAHESHWARI, YOGESH,2008-11-03 This book specifically designed for postgraduate students of management finance and commerce for the course in Investment Management or Security Analysis and Portfolio Management provides a thorough understanding of the concepts and methodologies of investment management It begins with a sound theoretical introduction to the basic concepts of savings investments risk and return portfolio and financial markets The text

then systematically explains the wide gamut of investment alternatives available to an investor and elucidates the investment markets and processes as prevalent in India. What distinguishes the text is that it emphasizes the practical aspects of the subject. In so doing, the book provides extensive coverage of the tools and techniques of technical analysis. Realizing the fact that investment is becoming more of a systematized and structured activity, the book presents a meticulous treatment of security analysis. This is closely followed by an exclusive chapter on portfolio management which encompasses all the aspects of the selection, maintenance, evaluation, and revision of portfolios. The book concludes with an overview of the regulatory environment of investments.

Key Features

- Explains the concepts and processes in the Indian context, thus enabling the students to know the markets and investment procedures in India.
- Focuses on the practical aspects to help students start investing even while they are doing the course.
- Provides end-of-chapter questions to drill the students in self-study.

Besides postgraduate students of management and commerce, senior undergraduate students of these courses as well as practising managers should find the book extremely useful.

Exploratory Data Analysis Using Fisher Information Roy Frieden, Robert A. Gatenby, 2010-05-27 Sustainability is often used in a qualitative sense However there is at present a great need to quantitatively measure and monitor its many qualitative aspects in real systems Real systems are regarded as sustainable if they can maintain their current desirable productivity and character without creating unfavorable conditions elsewhere or in the future 1 4 Sustainability therefore incorporates both concern for the future of the current system temporal sustainability and concern about the degree to which some areas and cultures of the planet are improved at the expense of other areas and cultures spatial sustainability That is sustainability is to hold over both space and time Sustainability encompasses many disciplines For example economic systems are not sustainable if they degrade their natural resource base and impoverish some sectors of the human population 5 6 Indices are needed that will measure sustainability through time and over space at several scales These indices must also have the ability to aggregate the many disciplinary facets of sustainability often incorporated through a large number of environmental social and economic variables Such a multidisciplinary dynamic system can be regarded as sustainable if it maintains a desirable steady state or regime including fluctuations that are desirable such as those that respond to natural disturbances 8
