Essays and Surveys on Multiple Criteria Decision Making P. Hansen, 2012-12-06 The Fifth International Conference on Multiple Criteria Decision Making not surprisingly had several objectives First it aimed at being a forum for exchange and intensive discussion of recent ideas on theory and practice of MCDM following the now well established tradition of the previous meetings in the series organized by H Thiriez and S Zionts in Jouy en Josas 1975 S Zionts in Buffalo 1977 G Fandel and T Gal in Hagen Konigswinter 1979 and J Morse in Newark 1980 Second closer contacts were desired between participants in these meetings and other active groups in the field prominent among which is the European Working Group on Multiple Criteria Decision Aid Third participation of senior or junior researchers who had recently developed important new methodologies such as the Analytical Hierarchy Process was actively sought for Fourth a synthesis of the rapidly expanding field of MCDM was to be made through selective surveys by leading researchers in the various areas it comprises Fifth cross fertilization and multidisciplinary research was to be encouraged through presentations on the connections between MCDM and mathematics economics game theory computer

science and other subjects Sixth much emphasis was to be given to real world applications of MCDM particularly large scale ones and or pioneering work in new fields The present volume reflects the general agreement observed among participants that these goals were largely attained

The International Student's Guide to Writing a Research Paper Janine Carlock,Maeve Eberhardt,Jaime Horst,Peter Kolenich,2017-06-13 The International Student s Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time This book is partly an update of Writing a Research Paper by Lionel Menasche 1998 and partly a companion to The ESL Writer s Handbook Each section of the book includes a discrete task called a Building Block which requires students to apply the skills learned toward the development of their own paper This step by step approach allows students to construct knowledge as they become more familiar with the process making writing a research paper a less intimidating task Special features This guide uses simple direct language for those for whom writing a research paper is new Most example writing is from international students in an ESL program or first year writing class including two sample papers one in APA and one in MLA A section on responding to instructor feedback to provide students with the tools to read and understand comments and use them to improve the first draft A subsection dedicated to constructing clear and cohesive paragraphs and sentences The guide includes citation and style examples in MLA 8th edition

Navigating Ethics in Behavior Analysis R. Nicolle Carr,2025-11-25 Navigating Ethics in Behavior Analysis considers the elusive topic of ethics in the professional context of behavioral analysis Students often assume their Applied Behavior Analysis Ethics class is going to be an easy A that it takes no more than common sense and a good moral compass to determine the line between right and wrong But as they quickly learn ethics are different from laws morals and common sense and when a variable is modified from how it was originally learned students can be at a loss for how to critically think through the situation Drawing from her extensive experience in both teaching and practice Nicolle Carr highlights the importance of critical thinking when considering questions of ethics in behavior analysis She examines the history and creation of the Behavior Analysis Certification Board s BACB current ethical code before exploring well known and novel approaches to navigating the ethical decision making process with added emphasis on contextual understanding These approaches are then applied in real world scenarios in schools clinics homes residential facilities higher education and within Organizational Behavior Management

Carr concludes by walking the reader through the process of an ethical violation from trying to solve an issue alone and ensuring the person falls under the BACB's jurisdiction to submitting the appropriate documents and what to expect as the process continues. Delving into the ethical curiosity created by grey areas that play out daily in the world of behavior analysis, this book will be an essential resource for students of behavioral analysis ethics as well as fully certified behavioral analysts.

Probabilistic Topic Model Inference for Textual Data Måns Magnusson, 2018-04-27 Probabilistic topic models have proven to be an extremely versatile class of mixed membership models for discovering the thematic structure of text collections. There are many possible applications covering a broad range of areas of study: technology, natural science, social science, and the humanities. In this thesis, a new efficient parallel Markov Chain Monte Carlo inference algorithm is proposed for Bayesian inference in large topic models. The proposed methods scale well with the corpus size and can be used for other probabilistic topic models and other natural language processing applications. The proposed methods are fast, efficient, scalable, and will converge to the true posterior distribution. In addition, in this thesis, a supervised topic model for high dimensional text classification is also proposed with emphasis on interpretable document prediction using the horseshoe shrinkage prior in supervised topic models. Finally, we develop a model and inference algorithm that can model agenda and framing of political speeches over time with a priori defined topics. We apply the approach to analyze the evolution of immigration discourse in the Swedish parliament by combining theory from political science and communication science with a probabilistic topic model.

Probabilistiska mnesmodeller: topic models är en mångsidig klass av modeller för att estimera mnessammansättningarna i stora korpusar. Applikationer finns i ett flertal vetenskapsområden som teknik, naturvetenskap, samhällsvetenskap och humaniora. I denna avhandling föreslås nya effektiva och parallella Markov Chain Monte Carlo algoritmer för Bayesianiska mnesmodeller. De föreslagna metoderna skalar väl med storleken på korpuset och kan användas för flera olika mnesmodeller och liknande modeller inom språkteknologi. De föreslagna metoderna är snabba, effektiva, skalbara och

konvergerar till den sanna posteriorfördelningen Dessutom föreslås en mnesmodell för högdimensionell textklassificering med tonvikt på tolkningsbar dokumentklassificering genom att använda en kraftigt regulariserande priorifördelningar Slutligen utvecklas en mnesmodell för att analysera agenda och framgång för ett förutbestämt mne Med denna metod analyserar vi invandringsdiskursen i Sveriges Riksdag varje tid genom att kombinera teori från statsvetenskap kommunikationsvetenskap och probabilistiska mnesmodeller
