Applied Neurosciences for the Allied Health Professions Douglas McBean, Frederike van Wijck, 2012-09-21 This brand new resource provides a solid comprehensive and accessible foundation in neurosciences for undergraduates and pre registration postgraduate students Using a multidisciplinary approach it will guide students in

their understanding of the most commonly found problems in neurological rehabilitation and inform their clinical practice. The book starts with the foundation of basic neurosciences covering the normal function and structure of the nervous system from the organism as a whole through to the molecular level. It also introduces perceptuo motor control and learning topics that lie at the heart of rehabilitation. The book then goes on to discuss problems that allied health professionals commonly encounter in neurological rehabilitation. Topics covered include problems with perception and movement planning, attention and memory, communication, motivation and emotion, sleep, continence and sexuality. The book also introduces key theories and evidence underpinning both behavioural and pharmacotherapeutic interventions used in neurological rehabilitation. The book closes by summarising current principles underpinning best practice and also looks to the future by identifying gaps in evidence based practice with ideas for future research and what the future may hold for neurological rehabilitation. Throughout a variety of supplementary information boxes point towards additional material such as Case Studies which highlight the clinical relevance of topics discussed and a variety of Research Boxes which refer to more advanced material and/or original research studies. Each chapter ends with self assessment questions which will check progress and prompt students to reflect on how the information presented in the chapter could be applied to clinical practice. Written by a multidisciplinary team highly experienced in teaching research and clinical practice. Lays the foundation of basic neurosciences for allied health students. Accessible and comprehensive text. Introduces students to key theories and evidence underpinning neurological rehabilitation. Focuses on clinically relevant information. End of chapter self assessment questions of different levels of complexity.

Anatomy & Physiology Coloring Workbook Books Veronica W. Veronica W. Fields,Anatomy Coloring Book,2016-12-15 An Easier and Better Way to Learn Anatomy The human body is wondrously complex with 700 muscles 206 bones and countless cells and tissues but studying and remembering all of them can be overwhelming Instead of rote memorization the Anatomy Coloring book helps you take an interactive approach to learning anatomy through coloring Not only can this take less time than memorizing from textbooks and flashcards but the process thoroughly fixes anatomical concepts in your mind for easier visual recall later

Anatomy and Physiology Coloring Book Sam Hammond,2020 **Physiology Coloring Workbook** Kenneth Axen,Kathleen Vermitsky Axen,1997 Physiology Coloring Workbook is a breakthrough approach to learning and

remembering the body's processes. Written and illustrated by experts who are both research scientists and teachers, it features 250 striking original illustrations that will give students a clear and enduring understanding of physiology. Learning interactively through coloring thoroughly fixes physiological concepts in the mind and takes less time than memorizing from textbooks. Physiological processes are fully explained and complex subjects are approached through the gradual introduction of simple drawings. The authors employ a logical and consistent use of color to convey information; for example, arterial blood is always red, whereas venous blood is blue and capillary blood is violet. Each lesson includes clearly displayed labels and specific coloring instructions. This book is an invaluable and lasting resource for students in disciplines including anatomy and physiology, biology, nursing, physical therapy and rehabilitation, medical technology, nutrition, physical education, allied health, and health sciences. The 250 plates in the book are organized in the following sections: Homeostasis, The Cell, Transport Mechanisms, Nervous System, Muscle, Cardiovascular System, Renal System, Respiratory System, Gastrointestinal System, Metabolism, Endocrine System, Reproduction.
