Environmental Change Oran R. Young, Leslie A. King, Heike Schroeder, 2008-08-22 This overview of recent research on how institutions matter in tackling environmental problems reports the findings and policy implications of a decade long international research project Studies show that institutions play a role both in causing and in addressing problems arising from human environment interactions But the nature of this role is complex and not easily described This book presents an overview of recent research on how institutions matter in efforts to tackle such environmental problems as the loss of biological diversity the degradation of forests and the overarching issue of climate change Using the tools of the new institutionalism in the social sciences the book treats institutions as sets of rights rules and decision making procedures Individual chapters present research findings and examine policy implications regarding questions of causality performance and institutional design as well as the themes of institutional fit or misfit interplay and scale Institutions and Environmental Change is the product of a decade long international research project on the Institutional Dimensions of Global Environmental Change IDGEC carried out under the auspices of the International Human Dimensions Programme The book s

policy insights demonstrate that research on institutions can provide the basis for practical advice on effective ways to deal with the most pressing environmental problems of our times Contributors Frank Biermann Carl Folke Victor Galaz Thomas Gehring Joyeeta Gupta Thomas Hahn Leslie A King Ronald B Mitchell Sebastian Oberth r Per Olsson Heike Schroeder Uno Svedin Simon Tay Arild Underdal Oran R Young **The 2014 European Parliament Elections in Southern Europe**

Hermann Schmitt,Eftichia Teperoglou,2018-02-02 Southern Europe has been the EU region most exposed to the Eurozone sovereign debt crisis with consequences for national party systems and political stability The 2014 European Parliament elections took place at a crucial time for Europe and Southern European societies more generally This book analyses the Euroelections in Southern Europe asking whether these followed the usual pattern of low stimulus contests or whether the crisis context raised the bar Country chapters on Italy Greece Spain Portugal Cyprus and Malta investigate the background of the elections the electoral campaign and the rise of Euroscepticism The linkage between governments economic performance the Europhile or Eurosceptic stances of political parties and their electoral performance are at the core of the analysis in each chapter The findings reveal that the political and electoral consequences of the economic crisis have not fundamentally challenged the second order character of the 2014 European Parliament elections in Southern Europe However electoral behaviour exhibits some indications of a more critical contest in which the EU divide becomes more significant and polarising in determining voting choices This book was previously published as a special issue of South European Society and Politics **Exploring Brain Functional Anatomy with Positron Tomography** Derek J.

Chadwick,Julie Whelan,2008-04-30 Details the application of positron emission tomography PET to the mapping of human cerebral cortical function Coverage includes all aspects of PET technology Includes chapters on somatosensory motor and visual systems and higher order processes such as attention memory learning intention and language The clinical usefulness of PET is discussed in relation to psychiatric illness and to functional recovery after brain injury The Anatomy and Biology of the Human Skeleton D. Gentry Steele,Claud A. Bramblett,1988 This handsome volume is the first photographically illustrated textbook to present for both the student and the working archaeologist the anatomy of the human skeleton and the study of skeletal remains from an anthropological perspective It describes the skeleton as not just a structure but a working system in the living body The opening chapter introduces basics of osteology or the study of bones the specialized and often confusing terminology of the field and methods for dealing scientifically with bone specimens The second chapter covers the biology of living bone its structure growth interaction with the rest of the body and response to disease and injury The remainder of the book is a head to foot structure by structure bone by bone tour of the skeleton More than 400 photographs and drawings and more than 80 tables illustrate and analyze features the text describes In each chapter structures are discussed in detail so that not only can landmarks of bones be identified but their functions can be understood and their anomalies identified as well Each bone s articulating partners are listed and the sequence of ossification of each bone is
