

More Great iOS 18 Features

What else does iOS 18 bring to the iPhone, and what can it do for you?

iPhone Mirroring

If you have a Mac running macOS Sequoia as well as your iOS 18 iPhone, you can control your Apple smartphone from your Mac – even if it's in your pocket or in another room. Just click a Dock icon, and your iPhone appears in a window on your Mac's desktop. You can open and use any of your iPhone apps from this window, and even transfer files between your devices. iPhone notifications also appear on your Mac, and clicking on them opens the app in question in the iPhone window.

Control your iPhone directly from your Mac.

Game Mode

Last year's Mac update brought it Game Mode, and iOS 18 brings it to the iPhone too. When you launch a game, Game Mode activates automatically. It minimises background activity and gives priority over the processor to the game. It also improves responsiveness with AirPods and wireless controllers by increasing the Bluetooth bandwidth.

Game Mode brings all sorts of benefits to iPhone gamers.

Messages via Satellite

If you don't have a Wi-Fi or cellular connection, you can text friends and family using Messages via Satellite. These end-to-end encrypted messages are sent directly through the Messages app, and can be sent through iMessage (to other Apple devices) and regular SMS messaging (to non-Apple gear).

Stay in touch while you're off the usual grid.
