Peter Clark, 2009-08-12 One of the best ways for students or practitioners to learn is through real life example In this volume Clark presents several case studies that can be used not only by those currently working in the industry but as a means for sparking discussion in food engineering classes This book has several purposes 1 to serve as a source of information about a representative collection of food processes with which Clark has had experience 2 to convey some practical lessons about process development and plant design and 3 to serve educators as a resource for class problems and discussion The book is organized in three broad sections The first concerns processes that are primarily physical such as mixing The second concerns processes that also involve biochemical changes such as thermal sterilization The third section addresses some broader issues that have not been discussed elsewhere including how to tour a plant how to choose among building a new plant expanding or renovating and how to develop processes **Process Integration for Resource Conservation** Dominic C.Y. Foo, 2025-01-31 To achieve environmental sustainability in industrial plants resource conservation activities such as material recovery have begun incorporating process integration techniques for reusing and recycling water utility gases solvents and solid waste Process Integration for Resource Conservation presents state of the art cost effective techniques including pinch analysis and mathematical optimization for numerous conservation problems The second edition of this best seller adds new chapters on heat integration and retrofitting of resource conservation networks and features multiple optimization examples via downloadable MS Excel spreadsheets Emphasizes the goal of setting performance targets ahead of detailed design following the holistic philosophy of process integration Explains various industrial examples step by step and offers demo software and other materials online Features a wealth of industrial case studies Adds chapters on heat integration combined heat and power heat integrated water network and retrofit of resource conservation network Adds new optimization examples and downloadable MS Excel files on superstructural approaches and automated targeting models for direct reuse recycle and regeneration Ideal for students preparing for real world work as well as industrial practitioners in chemical processing the text provides a systematic guide to the latest process integration techniques for performing material recovery in process plants The book features a solutions manual lecture slides and figure slides for adopting professors to use in their courses **Tools and Methods for Pollution Prevention** Subhas K. Sikdar, Urmila Diwekar, 2013-11-11 Difficult ethical and political issues confront the application of scientific and technological solutions for preventing pollution from occurring Often the questions embodying proposed solutions to known problems are ambiguous and no singular solution can exist for all locations Yet the common organizing principle for all solutions to environmental problems must be scientific because only sound science can provide a rational understanding that decision makers can use universally The NATO Advanced Research Workshop ARW on Tools and Methods for Pollution Prevention October 12 14 1998 Prague Czech Republic was designed to assemble experts from NATO and

former socialist countries of Eastern Europe to discuss science based tools and methods either available or in development that can be used to analyze environmental impacts of manufacturing processes and manufactured products The presentations at the workshop were written up specifically for the purpose of this book albeit after peer reviews and thorough revisions Most of the chapters focus on specific method development for designing environmentally benign processes or products Several chapters take a broader view and focus on such designs from an implementation perspective and dwell on ethical conflicts resistance to change because of inertia or inadequate infrastructure and on the lack of resources We placed these chapters at the beginning of the book The volume starts with the overview by Sikdar et al who describe the scope and difficulties of pollution prevention in the manufacturing sectors
