Building a Normative Order in the South China Sea Tran Truong Thuy, John B. Welfield, Le Thuy Trang, 2019 The South China Sea where a number of great powers and regional players contend for influence has emerged as one of the most potentially explosive regions in the world today What can be done to reduce the possibility of conflict solve the outstanding territorial problems and harness the potential of the sea to promote regional development environmental sustainability and security This book with contributions from leading authorities in China the Philippines Vietnam Australia Singapore and the United States seeks to illuminate these questions

Multimodality and Multilingualism Steph Ainsworth, Dominic Griffiths, Gee Macrory, Kate Pahl, 2023-03-01 This book explores the ways in which multimodality and multilingualism as areas of study intersect and provides empirical examples of how this looks in practice from a wide range of settings The chapters include visual as well as linguistic descriptions of practice and provide an accessible introduction to multimodality and multilingualism for a readership from undergraduate students to researchers The book argues that the everyday practices of multilingual communities are multimodal in nature and that by working at the intersection of multilingualism and multimodality we may be able to make fruitful advances in multiple areas of applied linguistics and properly appreciate the actual human complexities of communication

Reducing the Mortality Gap in People with Severe Mental Disorders: the Role of Lifestyle Psychosocial Interventions Andrea Fiorillo, Maurizio Pompili, Mario Luciano, Norman Sartorius, 2019-10-15 Patients with severe mental disorders SMD including major depression bipolar disorder schizophrenia and related spectrum disorders have a reduced life expectancy of 10 25 year compared with the general population This life expectancy gap is mainly due to the co occurrence of many physical diseases such as hypertension coronary heart disease stroke chronic obstructive pulmonary disease tuberculosis hepatitis and HIV Factors contributing to the reduced life expectancy can be grouped into three main categories a factors related to the patient b factors related to clinicians and c factors related to the health system As regards the first group patients with SMD often adopt unhealthy lifestyle behaviors including heavy smoking reduced physical activity sedentary behaviors poor diet and alcohol or drug abuse and are reluctant to seek for physical care with GPs and other medical specialists Increasing the levels of physical activity improving the dietary patterns and reducing the smoking habits of people with severe mental disorders represent a global health challenge and a public health priority Until now attempts made to reduce this mortality gap have acted at three different levels health system level physician level and patient level The third level interventions include electronic alerts through smartphones and web based platforms intensive case management promotion of healthy habits complex psychosocial interventions Several population based studies have showed that lifestyle behaviors are amenable to

change through the adoption of specific psychosocial interventions. However, most clinical guidelines, although emphasizing the importance of health monitoring and regular check-ups for patients with severe mental illnesses, do not make specific recommendations on the provision of lifestyle interventions. These lifestyle-oriented interventions, consisting of behavioral, educational, and psychological components, have been conducted mainly in research settings and have shown a good impact on patients' physical health. Despite this, their feasibility in routine settings has not been tested yet. It seems to be clinically and ethically relevant to develop, validate, and carry out interventions to improve the lifestyle behaviors of patients with severe mental disorders to reduce the presence of comorbidities and to improve their life expectancy. In this Research Topic, we will summarize the available knowledge of the efficacy and effectiveness of psychosocial interventions aimed at improving healthy lifestyle behaviors and promoting the physical health of patients with severe mental disorders. European Union Policies at a Time of Crisis Tomasz Grzegorz Grosse, 2017-03-02. In recent years and more specifically since the outbreak of the Eurozone crisis in 2010, the model of integration has changed. The rising political power of the strongest Member States and the political segmentation of the European Union into separate circles of integration have become the new reality. These processes have been accompanied by a range of related changes, such as the growing politicisation of the European Commission, increasing institutionalisation of the euro area, and petrification of the geographical and political division into central and peripheral states in the EU. At this point, it is difficult to predict whether these changes will prove temporary or permanent and what will be their systemic consequences or, in other words, how will they impact Europe's political system. It is similarly difficult to judge how the changes will influence specific EU policies. An attempt to answer these difficult but compelling questions is the objective of our book. Tomasz Grzegorz Grosse, Professor of Political Science and Head of Department of European Union Policies at the University of Warsaw, author of *In Search of Geo-economics in Europe* and co-editor of *The Aspects of a Crisis*. The authors of this volume offer a comprehensive analysis of conditions and results of EU policies in the context of European integration. The ambitious scope of the project required the knowledge of economics, history, political science, international relations, law, and even sociology. The authors fulfill their promise to the readers: the volume contains a comprehensive and detailed elucidation of the influence of the crisis on the integration practice and on the contemporary conditions of EU integration, including both its structure and functioning. Zbigniew Czachr, author of *The Crisis and Disrupted Dynamics of the European Union*. The volume edited by Tomasz G. Grosse promises to be a very valuable contribution to Polish European studies. It belongs to the broader field of critical reflections on European integration and, as such, it opens new possibilities of constructive debate about the present and the future of the European Union. Janusz Ruskowski, co-author of *Euro: Common Currency of the United Europe*. The Authors: Paweł J. Borkowski, Jacek Czaputowicz, Tomasz Grzegorz Grosse, Krzysztof M. Ksiński, Justyna Miecznikowska, Jadwiga Nadolska, Artur Nowak, Far Kamila Pronińska, Małgorzata Smutek, Krzysztof Szewior, Jolanta Szymańska, Joanna Ziłkowska.

Twice Exceptional Scott Barry Kaufman, 2018 In an educational system founded on rigid standards and categories students who demonstrate a very specific manifestation of intelligence flourish while those who deviate tend to fall between the cracks Too often talents and interests that do not align with classroom conventions are left unrecognized and unexplored in children with extraordinary potential but little opportunity For twice exceptional 2e children who have extraordinary strengths coupled with learning difficulties the problem is compounded by the paradoxical nature of their intellect and an unbending system ill equipped to cater to their unique learning needs *Twice Exceptional Supporting and Educating Bright and Creative Students with Learning Difficulties* provides cutting edge evidence based approaches to creating an environment where twice exceptional students can thrive Viewing the 2e student as neither exclusively disabled nor exclusively gifted but rather as a dynamic interaction of both leading experts offer holistic insight into identification social emotional development advocacy and support for 2e students With chapters focusing on special populations including autism dyslexia and ADHD as well as the intersection of race and 2e this book highlights practical recommendations for school and social contexts In expounding the unique challenges faced by the 2e population *Twice Exceptional* makes a case for greater flexibility in our approach to education and a wider notion of what it means to be academically successful

Chinese Politics as Fragmented

Authoritarianism Kjeld Erik Brødsgaard, 2016-10-04 This book explores how far the concept of fragmented authoritarianism remains valid as the key concept for understanding how the Chinese political process works It contrasts fragmented authoritarianism which places bureaucratic bargaining at the centre of policy making arguing that the goals and interests of the implementing agencies have to be incorporated into a policy if implementation is to be secured with other characterisations of China's political process Individual chapters consider fragmented authoritarianism at work in a range of key policy areas including energy issues climate change and environmental management financial reform and civil military relations The book also explores policy making at the national provincial city and local levels debates how far the model of fragmented authoritarianism is valid in its current form or whether modifications are needed and discusses whether the system of policy making and implementation is overcomplicated unwieldy and ineffective or whether it is constructive in enabling widespread consultation and scope for imagination flexibility and variation

Territorial Cohesion in Rural Europe Andrew K. Copus, Philomena de Lima, 2014-08-13 This book reflects on how the economies social characteristics ways of life and global relationships of rural areas of Europe have changed in recent years This reveals a need to refresh the

concepts we use to understand measure and describe rural communities and their development potential This book argues that Europe has outgrown many of the stereotypes usually associated with it with substantial implications for European Rural Policy Rural structural change and its evolving geography are portrayed through regional typologies and the concept of the New Rural Economy Demographic change migration business networks and agricultural restructuring are each explored in greater detail Implications for equality and social exclusion and recent developments in the field of governance are also considered Despite being a subject of active debate interventions in the fields of rural and regional development have failed to adapt to changing realities and have become increasingly polarized This book argues that rural regional policy needs to evolve in order to address the current complex reality partially reformulating territorial or place based approaches and the New Rural Paradigm following a set of principles termed Rural Cohesion Policy

CyberPhysical Systems Kostas Siozios,Dimitrios Soudris,Elias Kosmatopoulos,2022-09-01 As systems continue to evolve they rely less on human decision making and more on computational intelligence This trend in conjunction to the available technologies for providing advanced sensing measurement process control and communication lead towards the new field of Cyber Physical System CPS Cyber physical systems are expected to play a major role in the design and development of future engineering platforms with new capabilities that far exceed today s levels of autonomy functionality and usability Although these systems exhibit remarkable characteristics their design and implementation is a challenging issue as numerous heterogeneous components and services have to be appropriately modeled and simulated together The problem of designing efficient CPS becomes far more challenging in case the target system has to meet also real time constraints CyberPhysical Systems Decision Making Mechanisms and Applications describes essential theory recent research and large scale usecases that addresses urgent challenges in CPS architectures In particular it includes chapters on Decision making for large scale CPS Modeling of CPS with emphasis at the control mechanisms Hardware software implementation of the control mechanisms Fault tolerant and reliability issues for the control mechanisms Cyberphysical user cases that incorporate challenging decision making
