The end of the Cold War ushered in an age of American triumphalism best characterized by the Washington Consensus the idea that free markets democratic institutions limitations on government involvement in the economy and the rule of law were the foundations of prosperity and stability The last fifteen years starting with the Asian financial crisis have seen the gradual erosion of that consensus Many commentators have pointed to the emergence of a powerful new rival model state capitalism In state capitalist regimes the government typically owns firms in strategic industries Not beholden to private sector shareholders such firms are allowed to operate with razor thin margins if the state deems them strategically important China soon to be the world s largest economy is the best known state capitalist regime but it is hardly the only one In State Capitalism Joshua Kurlantzick ranges across the world China Thailand Brazil Russia South Africa Turkey and more and argues that the increase in state capitalism across

the globe has on balance contributed to a decline in democracy He isolates some of the reasons for state capitalism s resurgence the fact that globalization favors economies of scale in the most critical industries and the widespread rejection of the Washington Consensus in the face of the problems that have plagued the world economy in recent years That said a number of democratic nations have embraced state capitalism and in those regimes state backed firms like Brazil s Embraer have enjoyed considerable success Kurlantzick highlights the mixed record and the evolving nature of the model yet he is more concerned about the negative effects of state capitalism When states control firms whether in democratic or authoritarian regimes the government increases its advantage over the rest of society The combination of new technologies the perceived failures of liberal economics and democracy in many developing nations the rise of modern kinds of authoritarians and the success of some of the best known state capitalists have created an era ripe for state intervention State Capitalism offers the sharpest analysis yet of what state capitalism s emergence means for democratic politics around the world **The New York Daily Tribune Index** ,1889 Muslims in Ireland Oliver Scharbrodt,2015-03-20 This book combines historical sociological and ethnographic research methods to provide a rich and multi faceted study of the Muslim presence in Ireland in its historical and contemporary dimensions **The Transatlantic Colossus** Daniel Cardoso, Philani Mthembu, Marc Venhaus, Miguelángel Verde Garrido,2014-01-17 Now available online The Transatlantic Colossus Global Contributions to Broaden the Debate on the EU US Free Trade Agreement 2014 a publication from the Berlin Forum on Global Politics BFoGP in collaboration with the Internet Society Collaboratory and FutureChallenges org of the Bertelsmann Stiftung The free trade agreement TAFTA TTIP currently being negotiated between the United States and the European Union has the potential to significantly impact the lives of people on both sides of the Atlantic and across the world Because it is crucial to broaden the debate on this topic of global importance the Berlin Forum on Global Politics decided to send out an international call for papers in order to collect a strong plurality of views on TAFTA TTIP as part of the Collaboratory s Initiative on Globalization and the Internet The result is an open knowledge publication freely accessible under its Creative Commons BY license which includes 22 articles written by a multitude of well informed global stakeholders members of civil society academia think tanks consumer and activist groups and business organizations
