C. Stern, Adam S. Cifu, Diane Altkorn, 2019-11-29 This book is a tremendous asset for students and residents learning to develop their diagnostic skills It can also be useful as a refresher for established clinicians when the more common diagnoses are not the cause of a patient's complaints Doody's Review An engaging case based approach to learning the diagnostic process in internal medicine Doody's Core Titles for 2023 Symptom to Diagnosis Fourth Edition teaches an evidence based step by step process for evaluating diagnosing and treating patients based on their clinical complaints By applying this process clinicians will be able to recognize specific diseases and prescribe the most effective therapy Each chapter is built around a common patient complaint that illustrates essential concepts and provides insight into the process by which the differential diagnosis is identified As the case progresses clinical reasoning is explained in detail The differential diagnosis for that particular case is summarized in tables that highlight the clinical clues and important tests for the leading diagnostic hypothesis and alternative diagnostic hypotheses As the chapter progresses the pertinent diseases are reviewed Just as in real life the case unfolds in a stepwise fashion as tests are performed and diagnoses are confirmed or refuted Completely updated to reflect the latest research in clinical medicine this fourth edition is enhanced by algorithms summary tables questions that direct evaluation and an examination of recently developed diagnostic tools and guidelines Clinical pearls are featured in every chapter Coverage for each disease includes Textbook Presentation Disease Highlights Evidence Based Diagnosis and Treatment Medical Risks [2 Volumes] Edward A. Lew, Jerzy Gajewski, 1990-09-27 Medical Risks is the fruit of ten years research into mortality patterns by age and time elapsed for a wide variety of medical conditions It contains more detailed information on prognosis in specific impairments than can be found in any medical textbook Indeed it constitutes the largest compilation of evaluated data about prognosis according to age sex time elapsed and other factors affecting mortality notably for cancer cardiovascular diseases hypertension respiratory diseases gastrointestinal diseases genitourinary disorders endocrine and metabolic disorders neurological and psychiatric disorders overweight and underweight problems and occupational and lifestyle hazards The findings have been summarized in thirteen overview chapters supported by nearly 400 abstracts of mortality studies among hospital patients patients of individual or group physicians persons included in special surveys insured lives and other selected populations The abstracts focus on the relative mortality experiences as compared with healthy lives or the general population The abstracts based on the experience among insured lives also indicate the reductions in life expectancy for various impairments The diversity of the results in different investigations calls attention to the wide range of variability in medical risks under different

circumstances The scientific importance of the volume lies primarily in the evaluation and analyses of the mortality experience which is presented in a uniform life table format that facilitates comparisons No single work covers similar ground as extensively and in as much technical detail A scientist or physician who needs data on medical risks would have to consult hundreds of books articles and research reports to obtain comparable information
