Ontologies for Agents: Theory and Experiences Valentina Tamma, Stephen Cranefield, Timothy W. Finin, Steven Willmott, 2006-03-30 There is a growing interest in the use of ontologies for multi agent system applications On the one hand the agent paradigm is successfully employed in those applications where autonomous loosely coupled heterogeneous and distributed systems need to interoperate in order to achieve a common goal On the other hand ontologies have established themselves as a powerful tool to enable knowledge sharing and a growing number of applications have benefited from the use of ontologies as a means to achieve semantic interoperability among heterogeneous distributed systems In principle ontologies and agents are a match made in heaven that has failed to happen What makes a simple piece of software an agent is its ability to communicate in a social environment to make autonomous decisions and to be proactive on behalf of its user Communication ultimately depends on understanding the goals preferences and constraints posed by the user Autonomy is the ability to perform a task with little or no user intervention while proactiveness involves acting autonomously with no need for user prompting Communication but also autonomy and proactiveness depend on knowledge The ability to communicate depends on understanding the syntax terms and structure and the semantics of a language Ontologies provide the terms used to describe a domain and the semantics associated with them In addition ontologies are often complemented by some logical rules that constrain the meaning assigned to the terms These constraints are represented by inference rules that can be used by agents to perform the reasoning on which autonomy and proactiveness are based **Ford Falcon -**

Commemorative Edition Luke West, 2022-05-09 Ford Falcon Commemorative Edition celebrates the much loved car's six decade rule of Aussie roads and racetracks With the chequered flag flying on the Blue Oval favourite this book examines the first Falcons to take flight in the early 1960s through to the final FG X Special emphasis is placed on the glorious decade 1969-78 and the magnificent high performance machines from the Falcon XW GT HO to the XA XB and the Cobra These are cars that still command instant respect and ooze all the excitement emotion colour freedom and raw power of their time Ford Falcon captures the stories from the men who designed developed built and raced these bred for Bathurst beasts It features stunning photography of Falcon's triumphs milestones and majesty After some 56 years and 3.8 million cars what better way to say goodbye to Aussie motoring royalty **Focus On: 100 Most Popular Station Wagons** Wikipedia contributors,

Neotropical Birds of Prey David Whitacre, 2013-05-15

Until recently surprisingly little has been known about the biology and behavior of tropical forest raptors including such basic aspects as diets breeding biology habitat requirements and population ecology information critical to the development of conservation efforts The Peregrine Fund conducted a significant eight year long research program on the raptor species including owls in Tikal National Park in Guatemala to learn more about Neotropical birds of prey Impressive and unprecedented in scale this pioneering research also involved the development of new methods for detecting enumerating and studying these magnificent but often elusive birds in their forest home Beautifully illustrated with photographs of previously little known species the resulting book is the most important single source for information on the lowland tropical

forest raptor species found in Central America Neotropical Birds of Prey covers twenty specific species in depth including the Ornate Hawk Eagle the Barred Forest Falcon the Bat Falcon and the Mexican Wood Owl offering thorough synopses of all current knowledge regarding breeding biology and behavior diet habitat use and spatial needs Contributors to this landmark work also show how the populations fit together as a community with overlapping habitat and prey needs that can put them in competition with reptiles and mammalian carnivores as well yet differ from one another in their nesting or feeding behaviors and population dynamics The work s substantive original data offer interesting comparisons between tropical and temperate zone species and provide a basis for establishing conservation measures based on firsthand research Making available for the first time new data on the biology ecology behavior and conservation of the majestic owls and raptors of the New World tropics this book will appeal to a wide ornithological readership especially the many raptor enthusiasts around the world
