Accident is an invitation to reflect and exchange information on a number of topics in space safety and sustainability of
national and international interest The conference is also a forum to promote mutual understanding trust and the widest
possible international cooperation in such matters The once exclusive club of nations with autonomous sub orbital and orbital
space access capabilities is becoming crowded with fresh and ambitious new entrants New commercial spaceports are
starting operations and others are being built In the manned spaceflight arena a commercial market is becoming a tangible
reality with suborbital spaceflights and government use of commercial services for cargo and crew transportation to orbit
Besides the national ambitions in space the international cooperation both civil and commercial is also gaining momentum In
the meantime robotic space exploration will accelerate and with it the need to internationally better regulate the usage of
nuclear power sources Space bound systems and aviation traffic will share more and more a crowded airspace while aviation
will increasingly rely on space based safety critical services Finally most nations own nowadays space assets mainly satellites
of various kinds and purposes which are under the constant threat of collision with other spacecraft and with the ever
increasing number of space debris Awareness is increasing internationally as solemnly declared since decades in space
treaties that space is a mankind asset and that we all have the duty of caring for it Without proactive and courageous
international initiatives to organize space we risk to negate access and use of space to future generations **Automobile**
