

The oil pressure gauge (psi) pointer will move to the normal range of the gauge after starting the engine. Higher or lower readings may be indicated operating under different conditions. If the oil pressure drops below the normal operating band when the engine is running, there is a problem. Stop your vehicle as soon as possible, turn off the engine and add oil to the normal operating band. Do not operate the engine with the pump pressure below the normal operating band. Operating an engine without oil pressure can destroy the engine bearings and other engine parts.

Engine Temperature Gauge

This gauge (TEMP) indicates the temperature of the engine coolant. The pointer will move to the normal range of the gauge when the engine is warm. Readings may vary depending on weather and traffic conditions. There is no danger to the engine unless the indicator hand moves all the way to the H (hot) position. If it does, pull off of the road and stop the engine immediately to prevent severe engine damage. Refer to engine instructions before restarting engine. If the engine continues to overheat, stop the vehicle. Have the cooling system checked and repaired.

NOTE — The temperature indicating system design is based on the company standard requirements for engine cooling systems. It is possible under certain driving conditions, such as heavy traffic or stop-and-go driving in hot weather, for the gauge pointer to read at the very top of the normal band with the coolant temperature within specification.

Seat Belt Warning Light and Buzzer

This warning light glows for four to eight seconds after the ignition lock cylinder is turned to the ON position, regardless of seat belt usage. The seat belt warning buzzer will sound for the same period if the driver's belt is not in use.

INSTRUMENTS AND CONTROLS

Speedometer/Odometer

The speedometer indicates the vehicle's forward speed. The odometer records the total distance the vehicle has been driven and is useful in reminding you when the vehicle is due for periodic lubrication and routine maintenance by indicating total distance traveled. In Canada, the odometer is calibrated to register kilometers.

Light Controls

Headlight Switch

Pull the knob outward to the first position to turn on parking lights, tailights and side marker lights. At the second position, headlights, tailights, parking lights and side marker lights are on. At either position, the instrument panel lights and automatic transmission selector lights can be dimmed, brightened, or turned off by rotating the knob.

NOTE — On Executive Parcel Delivery Vans, the body mounted clearance and identification lights are on with the headlight switch at position 1 or position 2.

Headlight Dimmer Switch and Indicator Light

With the headlights on, press the headlight dimmer switch located on the floor to the left of the parking brake pedal, to change the headlights from low to high, or high to low beams. When the high beams are on, the indicator on the instrument panel will light.
