Phenotypes and Endophenotypes ,2009 *Localization of Clinical Neurology* Lakshmi Narasimhan

Ranganathan,2020-08-01 The South Asian Edition of *Localization in Clinical Neurology* is a unique and outstanding textbook on localization answering the trilogy of Neurology Is there a lesion Where is the lesion and What is the lesion There is no surrogate to history taking and clinical examination in the process of neuraxis localization The depths of knowledge unraveled in this book guides a beginners brain in training and satiates a master s mind at work Each chapter is carefully crafted to strengthen the anatomy sense of localization enhance the mind to solve the puzzles of neurology and reach the possible etiology Key Features Unique textbook on clinical localization with comprehensive coverage addressing all brain regions including cranial spinal and peripheral nerves Revision pearls at the end of each chapter provide a succinct summary of salient points in the chapter Multiple choice questions help in the revision of learned concepts Flow charts diagrams algorithms and tables assist in grasping the gist of the concepts Case scenarios provide a virtual experience of the bedside clinics Online videos and neurodiagnostic clues provide a better understanding of clinical findings Detailed discussions cover relevant anatomy followed by the lesions related to each anatomic feature

Environmental Epigenomics in Health and Disease Randy L Jirtle,Frederick L. Tyson,2013-05-16 There are now compelling human epidemiological and animal experimental data that indicate the risk of developing adult onset complex diseases and neurological disorders are influenced by persistent epigenetic adaptations in response to prenatal and early postnatal exposures to environmental factors Epigenetics refers to heritable changes in gene function that occur without a change in the sequence of the DNA The main components of the epigenetic code are DNA methylation histone modifications and non coding RNAs The epigenetic programs are established as stem cell differentiate during embryogenesis and they are normally faithfully reproduced during mitosis Moreover they can also be maintained during meiosis resulting in epigenetic transgenerational disease inheritance and also potentially introducing phenotypic variation that is selected for in the evolution of new species The objective of this book is to provide evidence that environmental exposures during early development can alter the risk of developing medical conditions such as asthma autism cancer cardiovascular disease diabetes obesity and schizophrenia later in life by modifying the epigenome

Some results on closed-loop identification of

quadcopters Du Ho,2018-11-21 In recent years the quadcopter has become a popular platform both in research activities and in industrial development Its success is due to its increased performance and capabilities where modeling and control synthesis play essential roles These techniques have been used for stabilizing the quadcopter in different flight conditions such as hovering and climbing The performance of the control system depends on parameters of the quadcopter which are often unknown and need to be estimated The common approach to determine such parameters is to rely on accurate measurements from external sources i e a motion capture system In this work only measurements from low cost onboard sensors are used This approach and the fact that the measurements are collected in closed loop present additional challenges First a general overview of the quadcopter is given and a detailed dynamic model is presented taking into account intricate aerodynamic phenomena By projecting this model onto the vertical axis a nonlinear vertical submodel of the quadcopter is obtained The Instrumental Variable IV method is used to estimate the parameters of the submodel using real data The result shows that adding an extra term in the thrust equation is essential In a second contribution a sensor to sensor estimation problem is studied where only measurements from an onboard Inertial Measurement Unit IMU are used The roll submodel is derived by linearizing the general model of the quadcopter along its main frame A comparison is carried out based on simulated and experimental data It shows that the IV method provides accurate estimates of the parameters of the roll submodel whereas some other common approaches are not able to do this In a sensor to sensor modeling approach it is sometimes not obvious which signals to select as input and output In this case several common methods give different results when estimating the forward and inverse models However it is shown that the IV method will give identical results when estimating the forward and inverse models of a single input single output SISO system using finite data Furthermore this result is illustrated experimentally when the goal is to determine the center of gravity of a quadcopter

From Anatomy to Function of the Central Nervous System Brandon Matteo Ascenzi,2024-08-25 *From Anatomy to Function of the Central Nervous System* Clinical and Neurosurgical Applications features neuroradiologic images that represent today one of the most effective resources able to detect the anatomy of the nerve structures Simultaneously featuring neuroimages readers can study the functional aspects of the entire central nervous system with detailed captions that describe in detail how to use and interpret them This book includes images of the brain dissected with the Klingler s method and white matter fiber dissection By integrating the anatomo functional description with the synaptic organization of the CNS this reference is useful for anyone who wants to understand how the activity of a nerve structure arises describing its microstructure neurotransmitter phenotype and neural activity It also features descriptions of pathologic conditions which result from neuroanatomical and or neurofunctional alterations and includes neurosurgical aspects Integrates anatomo functional descriptions with the synaptic and neurochemical organization of the CNS Allows readers to better understand the morphology and topography of encephalic structures Features neuroradiological images and human brain dissections using
