the built and unbuilt environment taking different cultural contexts and historical periods into consideration It studies some of the ethical questions raised by the nature of luxury in architecture and discusses whether architectural luxury is an unqualified benefit or something which should only be present within strict limits The author argues how the ideas of permissible and impermissible luxury have informed architecture and how these notions of ethical approval have changed from one context to another Providing voluptuous settings for the nobles and the leisure class luxury took the form of not only grand palaces but also follies country and suburban houses private or public entertainment venues and ornate skyscrapers with fast lifts The Architecture of Luxury proposes that in Western societies the growth of the leisure classes and their desire for various settings for pleasure resulted in a constantly increasing level of luxury sought within everyday architecture
