Segal,Amy O. Tsui,Susan M. Rogers,2012-12-06 This volume contains papers presented at the Conference on the Demographic and Programmatic Consequences of Contraceptive Innovations which was sponsored by the Committee on Population and held at the National Academy of Sciences October 6 7 1988 The papers consider how new contraceptive methods currently being developed and changes in the use of already available contraceptives could affect contraceptive practice levels and patterns of abortion use and the health of women In addition several of the papers re view the probable consequences of introducing new technology into family planning programs in developing countries The Committee on Population sponsored this conference in order to stimulate think ing and to provide a forum for scientists family planning program managers and donor agency personnel to exchange information and ideas about these important issues The

committee is publishing these papers to expand the discussion of consequences of contraceptive innovations and to give scientists policy makers and members of the public who could not attend the conference an opportunity to learn about new developments in fertility control and their likely consequences for individuals and the societies in which they live NEED FOR NEW METHODS While a strong case can be made that the pill and the intrauterine device IUD have contributed to declines in the level of unintended pregnancies around the world it is also clear that for many couples existing methods present problems
