module will help you get to grips with the tools used in Kali Linux 2.0 that relate to web application hacking. You will get to know about scripting and input validation flaws, AJAX and security issues related to AJAX. You will also use an automated technique called fuzzing so you can identify flaws in a web application. Finally, you will understand the web application vulnerabilities and the ways they can be exploited. In the last module, you will get started with Android security. Android, being the platform with the largest consumer base, is the obvious primary target for attackers. You will begin this journey with the absolute basics and will then slowly gear up to the concepts of Android rooting, application security assessments, malware infecting APK files, and fuzzing. You will gain the skills necessary to perform Android application vulnerability assessments and to create an Android pentesting lab. This Learning Path is a blend of content from the following Packt products: Kali Linux 2, Windows Penetration Testing by Wolf Halton and Bo Weaver, Web Penetration Testing with Kali Linux, Second Edition by Juned Ahmed Ansari, Hacking Android by Srinivasa Rao Kotipalli and Mohammed A. Imran, Style and approach: This course uses easy-to-understand yet professional language for explaining concepts to test your network's security.
