

MANATEE MISSION

A LARGE manatee has been rescued in South Carolina, USA.

Members of the SeaWorld Rescue team, along with several other organisations, helped save a large, male manatee who was suffering from cold stress. He was then transported to Jacksonville Zoo for treatment.

Last year was SeaWorld Rescue's biggest year for manatee rescues ever. They saved 69 manatees, with 23 already returned to the wild.

WHY DOES JAPAN WANT TO HUNT WHALES?

JAPAN has revealed that it is going to start commercial whaling again for the first time in 30 years – but why?

In 1986 a global ban was put in place on commercial whaling. In July this year, Japan will defy that ban. Whales have been hunted for their meat for centuries in Japan, so some people say it is an important tradition. They also claim that stocks of some species of whales are now big enough to support hunting again. The country plans to only hunt whales in Japanese territorial waters and the 200-mile 'exclusive economic zone' around its coasts.

However, conservationists have criticised the move to start hunting whales again, as it could have a terrible effect on whale populations. The International Whaling Commission originally banned commercial whaling due to numbers of the creatures falling around the world. Since then, some whale populations have come back from the brink of extinction. But with Japan starting hunting again, the creatures' futures are uncertain.

CRANE COMEBACK

THE UK's tallest bird has had its most successful year in 2018.

The RSPB has released figures that reveal a record 54 pairs of the common crane (measuring 120cm tall) have produced 25 chicks, bringing the national total population to around 180 birds. This is the highest number since 1979.

HAPPY BIRTHDAY HAMISH!

THE UK's only polar bear cub has celebrated his first birthday.

Hamish lives at the Royal Zoological Society of Scotland's Highland Wildlife Park and was born in December 2017. He celebrated his big day with his mum, Victoria, and a special ice birthday cake filled with his favourite treats.

In the wild, polar bear cubs stay with their mums for two to three years. When Hamish is ready to leave Victoria, it is hoped he will play a role in the European endangered species breeding programme.

interdisciplinary study of human animal relations becomes crucial to the urgent questions of our time notably in relation to environmental crisis this collection explores the inner tensions within the relatively new and broad field of animal studies This provides a platform for the latest critical thinking on the condition and experience of animals The volume is structured around four sections engaging theory doing critical animal studies critical animal studies and anti capitalism contesting the human liberating the animal veganism and activism The Rise of Critical Animal Studies demonstrates the centrality of the contribution of critical animal studies to vitally important contemporary debates and considers future directions for the field This edited collection will be useful for students and scholars of sociology gender studies psychology geography and social work **Animal Industries** Taina Syrjämaa,Marja Jalava,Taija Kaarlenkaski,Otto Latva,Eeva Nikkilä,Tuomas Räsänen,2024-04-01 This book examines an extremely topical phenomenon the massive industrial exploitation of animals from a previously neglected perspective It explores the history and development of animal industries in Nordic countries from their establishment in the late nineteenth century to the present day These countries are often considered to be

progressive and advanced in animal protection but consumption practices in this area are actually excessive in relation to planetary resources and are among the most unsustainable on a global scale. If we want to understand current problems it is essential to be aware of long term changes and continuities as well as the diversity of animals that have been exploited. The purpose of this book is to explain these changes and provide new knowledge for scholars in human animal studies, decisionmakers and the general public.

A Transnational History of the Australian Animal Movement, 1970-2015
Gonzalo Villanueva, 2017-10-20

This book offers the first transnational historical study of the creation, contention and consequences of the Australian animal movement. Largely inspired by Peter Singer and his 1975 book *Animal Liberation*, a new wave of animal activism emerged in Australia and across the world. In an effort to draw public and media attention to the plight of animals such as the rearing of pigs and poultry in factory farms and the export of live animals to the Middle East and South East Asia, Australian activists were often innovative and provocative in how they made their claims. Through lobbying, disruptive methods and vegan activism, the animal movement consistently contested the politics and culture of how animals were used and exploited. Australians not only observed and learnt from people and events overseas but also played significant international roles. This book examines the complex and conflicting consequences of the animal movement for Australian politics as well as its influence on broader social change.
