Considering Animals Dr Carol Freeman, Dr Elizabeth Leane, Ms Yvette Watt, 2013-07-28

Considering Animals draws on the expertise of scholars trained in the biological sciences humanities and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals Taking their cue from the specific animal moments that punctuate these interactions the essays engage with contemporary issues and debates central to human animal studies the representation of animals the practical and ethical issues inseparable from human interactions with other species and perhaps most challengingly the compelling evidence that animals are themselves considering beings Case studies focus on issues such as animal emotion and human sentimentality the representation of animals in contemporary art and in recent films such as March of the Penguins Happy Feet and Grizzly Man animals experiences in catastrophic events such as Hurricane Katrina and the SARS outbreak and the danger of overvaluing the role humans play in the earth's ecosystems From Marc Bekoff's moving preface through to the last essay Considering Animals foregrounds the frequent sometimes uncanny exchanges with other species that disturb our self-contained existences and bring into focus our troubled relationships with them Written in an accessible and jargon free style this collection demonstrates that in the face of species extinction and environmental destruction the roles and fates of animals are too important to be left to any one academic discipline

35 Rubrics and Checklists to Assess Reading and Writing Adele Fiderer, 1998 Drawing on her extensive experience as a teacher the author shares quick clear and easy rubrics for accessing students work These ideas will help students learn the qualities of a good performance and give parents a detailed picture of their children's progress

Why Animal Experimentation Matters Ellen Frankel Paul, Jeffrey Paul, Animal experimentation has made a crucial contribution to many of the most important advances in modern medicine The development of vaccines for deadly viruses like rabies and yellow fever depended upon animal research and much of our basic knowledge about human health and physiology was discovered through the use of animals as well In spite of these gains animal rights activists have been zealous in communicating to the public and policymakers their view that the use of animals in medical research is morally wrong and should be severely curtailed or eliminated The activists arguments draw upon a range of disciplines and focus on both practical and ethical aspects of animal experimentation Advocates of animal experimentation have been slow to respond to these arguments Given that the worldwide toll of communicable diseases is still immense and that deadly new pathogens may emerge at any time in the future to menace human health failing to defend animal experimentation from the arguments of its opponents has disastrous implications A quick response to an unanticipated threat on the order of the AIDS epidemic is unimaginable absent a vigorous research establishment which in turn is dependent on animal proxies Why Animal

Experimentation Matters is a first attempt by research scientists and moral philosophers to mount a convincing defense against animal rights enthusiasts. Because opponents of animal experimentation come from a variety of intellectual backgrounds, this defense is necessarily interdisciplinary as well. In this collection of eight essays, the authors scrutinize how animal experimentation actually functions in the laboratory, the vital role that it plays in palliating and eradicating human and animal diseases, and the moral justification for sacrificing animals for the betterment of human life. The subjects covered in the essays include the moral status of animals and persons, the importance of animals for advancing scientific knowledge, the history of animal experimentation and of its detractors, differing theoretical approaches of American and European animal experimentation, regulations, the heavily restrictive legislation promoted by animal rights activists, and the threats posed to research and researchers by violent animal rights zealots. Contributors include Baruch Brody, H. Tristram Englehardt Jr., R. G. Frey, Kenneth F. Kiple, and Kriemhild Cone Ornelas. Adrian R. Morrison, Charles S. Nicoll, and Sharon M. Russell, Jerrold Tannenbaum, and Stuart M. Zola. This important anthology will be of interest to scientists, philosophers, individuals suffering from heritable or communicable diseases, relatives of afflicted individuals, and policymakers. Ellen Frankel Paul is deputy director of the Social Philosophy and Policy Center, professor of political science and philosophy at Bowling Green State University, and editor in chief of the journal *Social Philosophy*; both are professors of philosophy at Bowling Green State University.
