M. Davis,2012-11-12 Ever since the discovery of fossil remains of extinct animals associated with flint implements bones and other animal remains have been providing invaluable information to the archaeologist In the last 20 years many archaeologists and zoologists have taken to studying such archaeofaunal remains and the science of zoo archaeology has come into being What was the nature of the environment in which our ancestors lived In which season were sites occupied When did our earliest ancestors start to

hunt big game and how efficient were they as hunters Were early humans responsible for the extinction of so many species of large mammals 10 20 000 years ago When where and why were certain animals first domesticated When did milking and horse riding begin Did the Romans influence our eating habits What were sanitary conditions like in medieval England And could the terrible pestilence which afflicted the English in the seventh century AD have been plague These are some of the questions dealt with in this book The book also describes the nature and development of bones and teeth and some of the methods used in zoo archaeology

**Practical Ecology for Geography and Biology** M. Gilbertson, 2012-12-06 Our aim in writing this book is to provide students and teachers with a simple introductory text which deals with practical aspects of ecology environmental biology and biogeography emphasizing actual field and classroom investigations Basic concepts and methods of survey mapping and aerial photography data collection and data analysis are described and discussed in order to encourage students to identify and tackle worthwhile projects The level at which this text is appropriate depends very much upon particular circumstances The greater part lies within the scope of the sixth form and the first and second years of college polytechnic and university courses in the British Isles and their equivalents overseas All students inevitably meet difficulties in the identification of plant and animal species particularly when they venture into unfamiliar habitats and regions This is often the cause of unnecessary alarm Many ecological principles or problems may be illustrated by reference to familiar species and habitats such as are found in urban environments as well as those areas of semi natural vegetation favoured for field courses
