Handbook of Animal Diversity Richard E. Blackwelder, 2019-08-08 This book is a summary of the diversity between and within the classes of animals It is intended for reference on all aspects of animals that can be studied comparatively but

such comparisons requires that the occurrence of the feature in question be known for more than just one or two groups. It is in large part a book on invertebrate animals because the vertebrates form only a small part of the diversity of animals.

Animal Companions Ingrid H. Tague, 2015-06-17. *Animal Companions* explores how eighteenth century British society perceived pets and the ways in which conversation about them reflected and shaped broader cultural debates. While Europeans kept pets long before the eighteenth century, many believed that doing so was at best frivolous and at worst downright dangerous. Ingrid Tague argues that for Britons of the eighteenth century, pets offered a unique way to articulate what it meant to be human and what society ought to look like. With the dawn of the Enlightenment and the end of the Malthusian cycle of dearth and famine that marked previous eras, England became the wealthiest nation in Europe with a new understanding of religion, science, and non-European cultures, and unprecedented access to consumer goods of all kinds. These transformations generated excitement and anxiety that were reflected in debates over the rights and wrongs of human-animal relationships. Drawing on a broad array of sources including natural histories, periodicals, visual and material culture, and the testimony of pet owners themselves, *Animal Companions* shows how pets became both increasingly visible indicators of spreading prosperity and catalysts for debates about the morality of the radically different society emerging in eighteenth century Britain.

Ecofeminist Literary Criticism Greta Claire Gaard, Patrick D. Murphy, 1998. *Ecofeminist Literary Criticism* is the first collection of its kind, a diverse anthology that explores both how ecofeminism can enrich literary criticism and how literary criticism can contribute to ecofeminist theory and activism. Ecofeminism is a practical movement for social change that discerns interconnections among all forms of oppression: the exploitation of nature, the oppression of women, class exploitation, racism, colonialism. Against binary divisions such as self/other, culture/nature, man/woman, humans/animals, and white/non-white, ecofeminist theory asserts that human identity is shaped by more fluid relationships and by an acknowledgment of both connection and difference. Once considered the province of philosophy and women's studies, ecofeminism in recent years has been incorporated into a broader spectrum of academic discourse. *Ecofeminist Literary Criticism* assembles some of the most insightful advocates of this perspective to illuminate ecofeminism as a valuable component of literary criticism.

Urban Wildlife Management, Second Edition Clark E. Adams, 2012-06-15. When the first edition of *Urban Wildlife Management* was published two years ago, it provided conservationists, ecologists, and wildlife professionals with a welcome shift in the way that interactions between humans and wildlife were viewed and managed. Instead of focusing on ways to evict or eradicate wildlife encroached on by urban

development this unique work took a holistic ecosystems approach Gathering information from more than five hundred academic sources and the popular media this book educated us on the complete nature of the problem See what's new in the Second Edition New information garnered from secondary data sets Added contributions from an extended list of leading wildlife specialists Original research conducted by the authors and their students New chapters on urban soils urban waters and zoonotic diseases More perspective essays and case studies Single species profiles in each chapter that focus on management issues Numerous tables examining trends by species and by region Through discussions of past and present approaches in the United States the book explores the changing landscape of wildlife management and future approaches Urban habitats and hazards are defined in terms of green and gray spaces Sociopolitical issues are discussed in terms of wildlife management stakeholder responsibilities and legal considerations And wildlife are viewed as adaptive inhabitants of an evolving ecosystem rather than as interlopers in a humans only world The author maintains a blog exploring wildlife in our own backyard
