Argument and Language ,2019-02-18 Science Inquiry Argument and Language describes research that has focused on
addressing the issue of embedding language practices within science inquiry through the use of the Science Writing
Heuristic approach In recent years much attention has been given to two areas of science education scientific argumentation
and science literacy The research into scientific argument have adopted different orientations with some focusing on science
argument as separate to normal teaching practices that is teaching students about science argument prior to using it in the
classroom context while others have focused on embedding science argument as a critical component of the inquiry process
The current emphasis on science literacy has emerged because of greater understanding of the role of language in doing and
reporting on science Science is not viewed as being separate from language and thus there is emerging research emphasis
on how best to improving science teaching and learning through a language perspective Again the research orientations are
parallel to the research on scientific argumentation in that the focus is generally between instruction separate to practice as
opposed to embedding language practices within the science classroom context *Math and Bio 2010* Lynn Arthur
