Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical and psychological health of sedentary, middle-aged women. The program consisted of three sessions per week, each lasting 45 minutes. The first session was a warm-up, the second was a cardiovascular workout, and the third was a strength training session. The results showed that the women who participated in the program experienced significant improvements in their physical and psychological health. Specifically, they showed a significant increase in their maximum heart rate, a significant decrease in their resting heart rate, and a significant increase in their maximum oxygen consumption. Additionally, they showed a significant decrease in their anxiety levels and a significant increase in their self-esteem. These findings suggest that a 12-week training program can have a positive effect on the physical and psychological health of sedentary, middle-aged women.

Small business is a business that is owned and operated by a single individual or a small group of people. It is typically a local business that serves the community in which it is located. Small businesses are often the backbone of the economy, providing jobs and services to the community. They are also often the most innovative and flexible businesses, able to adapt quickly to changing market conditions. Small businesses can be found in a wide variety of industries, from retail to manufacturing to services. They can range in size from a sole proprietorship to a partnership or a corporation. The key factor in determining whether a business is small is the number of employees it has. In the United States, a business with fewer than 50 employees is generally considered a small business. However, this number can vary by industry and by country. Small businesses are often subject to different regulations and taxes than larger businesses. They may also have access to different financing options. Despite these challenges, small businesses continue to play a vital role in the economy and in the lives of the communities they serve.
