Helaine Silverman, William H. Isbell, 2015-01-28 The origins and development of civilization are vital components to the understanding of the cultural processes that create human societies Comparing and contrasting the evolutionary sequences from different civilizations is one approach to discovering their unique development One area for comparison is in the Central Andes where several societies remained in isolation without a written language As a direct result the only resource to understand these societies is their material artifacts In this second volume the focus is on the art and landscape remains and what they uncover about societies of the Central Andes region The

Benson, 2012-07-15 The Moche or Mochica created an extraordinary civilization on the north coast of Peru for most of the first millennium AD Although they had no written language with which to record their history and beliefs the Moche built enormous ceremonial edifices and embellished them with mural paintings depicting supernatural figures and rituals Highly skilled Moche artisans crafted remarkable ceramic vessels which they painted with figures and scenes or modeled like sculpture and mastered metallurgy in gold silver and copper to make impressive symbolic ornaments They also wove textiles that were complex in execution and design A senior scholar renowned for her discoveries about the Moche Elizabeth P Benson published the first English language monograph on the subject in 1972 Now in this volume she draws on decades of knowledge as well as the findings of other researchers to offer a grand overview of all that is currently known about the Moche Touching on all significant aspects of Moche culture she covers such topics as their worldview and ritual life ceremonial architecture and murals art and craft supernatural beings government and warfare and burial and the afterlife She demonstrates that the Moche expressed with symbolic language in metal and clay what cultures in other parts of the world presented in writing Indeed Benson asserts that the accomplishments of the Moche are comparable to those of their Mesoamerica contemporaries the Maya which makes them one of the most advanced civilizations of pre Columbian America

Staller, 2020-12-01 There is widespread acknowledgement among anthropologists archaeologists ethnobotanists as well as researchers in related disciplines that specific foods and cuisines are linked very strongly to the formation and maintenance of cultural identity and ethnicity Strong associations of foodways with culture are particularly characteristic of South American Andean cultures Food and drink convey complex social and cultural meanings that can provide insights into regional interactions social complexity cultural hybridization and ethnogenesis This edited volume presents novel and creative anthropological archaeological historical and iconographic research on Andean food and culture from diverse temporal periods and spatial settings The breadth and scope of the contributions provides original insights into a diversity of topics such as the role of food in Andean political economies the transformation of foodways and cuisines through time and ancient iconographic representations of plants and animals that were used as food Thus this volume is distinguished from most of the published literature in that specific foods cuisines and culinary practices are the primary subject matter through which aspects of Andean culture are interpreted *Inside Abstraction* Carolyn Dean, 2025-09-23 Illuminating the abstract art of the Inka what it conveys about Inka values and its relationship to those who view it Inka visual culture is unusual in its tendency toward abstraction Public stonework vessels used at state feasts garments worn by the imperial elite these objects announcing status and power are adorned with geometric designs that refuse figuration After searching in vain for hidden referents many scholars have largely given up the search for meaning Inside Abstraction develops a novel interpretation Eminent art historian Carolyn Dean proposes that Inka geometries are neither ornamental nor coded depictions of other objects Rather Dean shows that in the Andean world the designs were functionally self aware possessing perspectives of their

own quite literally looking back at and addressing viewers directly Further Dean contends that these agent abstractions were teachers conveying particular messages concerning social hierarchy the relations among geometries and colors instructed viewers as to their own proper social relations Inka designs thereby served imperial aims by wordlessly communicating the state's values and demands for submission Extensively illustrated and rigorously argued *Inside Abstraction* is a dramatic step forward in our understanding of Inka art and political order Indian Art of the Americas at the Art Institute of Chicago Richard F.
