Kövecses,Réka Benczes,Veronika Szelid,2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context **Encyclopedia of Women and Gender, Two-Volume Set** Judith Worell,2001-10-16

The study of gender differences began in earnest in the 1970s and has since increased dramatically to infiltrate virtually all fields of study in the social and behavioral sciences Along the way it was discovered that while women very often think and behave differently than do men industrialized societies cater to masculine perspectives The Psychology of Women emerged as a field of study focusing on just those areas in which women most often butted against assumed roles And similarly in the 1990s the Psychology of Men emerged to focus on the same issues for men The Encyclopedia of Gender covers all three areas under one cover discussing psychological differences in personality cognition and behavior as well as biologically based differences and how those differences impact behavior Coverage includes studies of these differences in applied settings such as education business the home in politics sports competition etc Key Features Over 100 In depth chapters by leading scholars in the psychology of women and gender Addresses critical questions of similarities and differences in gendering across diverse groups challenging myths about gender polarization and the Venus Mars distinction Broad coverage of topics from theory and method to development personality violence sexuality close relationships work health and social policy Sensitive attention to multicultural and cross cultural research Clearly written readable comprehensive with helpful guides outline glossary reference list Raises difficult questions related to power inequality ethics and social justice Challenges the reader to revise established truths and to seek further information
