For any data set, the mean is the average of the data. The median is the middle value of the data. The mode is the value that appears most often. The range is the difference between the highest and lowest values. The standard deviation is a measure of the spread of the data. The variance is the square of the standard deviation. The coefficient of variation is the standard deviation divided by the mean. The skewness is a measure of the asymmetry of the distribution. The kurtosis is a measure of the "tailedness" of the distribution. The normal distribution is a bell-shaped curve that is symmetric and has a mean, median, and mode that are all equal. The standard normal distribution has a mean of 0 and a standard deviation of 1. The normal distribution is used to model many natural phenomena. The normal distribution is also used in hypothesis testing and confidence intervals. The normal distribution is a good approximation for many data sets. The normal distribution is a good approximation for many data sets. The normal distribution is a good approximation for many data sets.
