

The Origins of Sociology

- *The field of sociology did not exist before the 19th century. Social upheaval—caused by the French Revolution and Industrial Age—led intellectuals to think deeply about how to bring back a sense of community and restore social order.*
- **Auguste Comte (France, 1798-1857)**
 - Father of Sociology; believed social behavior should be studied scientifically
 - Coined the term positivism, meaning conclusions about society should be made using scientific observation
 - Distinguished between social statics (study of social stability and order) and social dynamics (study of social change)
- **Harriet Martineau (England, 1802-1876)**
 - Translated Comte's work; her own work was very popular, making her a celebrity of her time
 - Linked slavery with oppression of women; spoke out for emancipation; her ideas on feminist theory are still read today
- **Herbert Spencer (England, 1820-1903)**
 - Compared social stability to the human body; all parts (economics, religion, government, family, etc.) must work together for a healthy society
 - Introduced Social Darwinism (survival of the fittest) and believed that people should not interfere in social change, even if competitive actions of corporations were causing injustice for the poor
- **Karl Marx (Germany, 1818-1883)**
 - Founder of Communism; believed that workers should plan revolutions to ensure equality and distribution of wealth.
 - Identified social classes and theorized about class conflict—the struggle between bourgeoisie (owners) and proletariat (workers)
 - Saw communism as positive and capitalism as negative; believed that capitalism would self-destruct eventually
- **Emile Durkheim (France, 1858-1917)**
 - Believed society existed because of consensus among its members (social contract theory); distinguished between mechanical solidarity (preindustrial society) and organic solidarity (industrial society)
 - Introduced the use of statistics to the field of sociology; demonstrated that human behavior must be explained by social factors and not just psychological ones
- **Max Weber (Germany, 1864-1920)**
 - Believed that human beings acted on their own understanding of a situation; verstehen (putting yourself in someone else's shoes) was needed to understand how behavior is affected by personal meanings, values, beliefs and attitudes
 - Identified rationalization (relying on knowledge, reasoning and planning) as the key transition between preindustrial and industrial societies; used ideas of rationalization and verstehen to identify bias in social research
- **Jane Addams (America, 1860-1935)**
 - Social worker and co-founder of Hull House (social services organization) in Chicago; awarded Nobel Peace Prize in 1931
 - Focused on imbalance of power among social classes and the effects of industrialization on the poor; she was also a suffragist
- **W.E.B. Du Bois (America, 1868-1963)**
 - Focused on issues of race both inside and outside of the United States
- **What's Your Perspective?**
- **Read "The McDonaldization of Higher Education" on page 20 in your textbook. Answer the two questions at the end of the reading. Be prepared to discuss your answers with the class.**

Turner,2007-02-25 For almost thirty years sociologists have increasingly theorized about and conducted

research on human emotions Surprisingly it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry What makes this late date surprising is that it is now obvious that human behavior interaction and organization are driven by emotions It was an immense oversight for emotions to be de emphasized in sociological theorizing and research for most of its 175 year history Since the 1970s however the study of emotions has accelerated and is now at the forefront of sociological analysis This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs The first section of the book addresses the range of emotions and how they can be classified the neurological underpinnings of emotions and the effect of gender on emotions The second section reviews the prominent sociological theories of emotions including theories emphasizing power and status rituals identity and self psychoanalytic dynamics exchange expectation states and evolution While there is little integration among these theories this state of affairs will not last forever The third section addresses theory and research on specific emotions such as love jealousy and envy empathy sympathy anger grief and the moral emotions While this list does not exhaust the range of human feeling they are central emotions that drive human behavior interaction and social organization The last section explores how the study of emotions has added new insight into other subfields within sociology such as the study of the workplace health and social movements These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology Although no book can completely cover a field even a relatively new one like the sociology of emotions this Handbook of the Sociology of Emotions comes close to being comprehensive The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years

Contemporary Sociological Thought Sean P. Hier, 2005-11-01 This innovative new reader on contemporary sociological theory has a Canadian emphasis This volume unites 21 influential European and American social theorists with 13 Canadian thinkers and writers to offer a strong Canadian interpretation of international theoretical currents spanning almost 80 years Ideally designed for undergraduate courses as an introduction to modern sociological theory the first section masterfully introduces the major theoretical offerings of the 20th century structural functionalism symbolic interaction and feminist analysis It also profiles themes of class conflict and the state and modernism culture and change The second section is devoted to critical themes for the 21st century This includes postmodernity and its critics society subjects and the self globalization and global consciousness and postcolonialism diaspora citizenship and identity Unique features of the book are its provocative presentation of 21st century themes and the inclusion of many of today s most influential social thinkers such as Edward Said Stuart Hall Jurgen Habermas Ulrich Beck Jean Baudrillard and

of sociology **Qualitative Methods and Health Policy Research** Elizabeth Murphy, 2017-07-05 Qualitative researchers have traditionally been cautious about claiming that their work was scientific The right on schools have exaggerated this caution into an outright rejection of science as a model for their work Science is for them outmoded an archaic form of consciousness surviving for a while yet in a degraded form Tyler 1986 200 Scientists assertions that they are in pursuit of truth simply camouflage their own lust for power There is no essential difference between truth and propaganda The authors acknowledge that the boundary between science and propaganda has often been breached and some distrust of scientific claims may be healthy They also question the claim that science creates disinterested and objective knowledge of an observer independent world without concluding that science is impossible The skeptics reservations about qualitative research are based on the deep rooted assumption among natural scientists and some social scientists that there is a world out there prior to and independent of their observations This world can be known objectively in the sense that all observers will if identically placed see it in exactly the same way If a suitable language were available they would also all produce identical descriptions From these observations they can work out the laws governing the world s operations The authors try to resolve these contrary claims by asserting that science is a procedural commitment It consists of openness to refutation a conscientious and systematic search for contradictory evidence and a readiness to subject one s preconceptions to critical examination The devotion to truth as a regulative ideal is an essential difference between science and propaganda This work is a unique and innovative defense of scientific method Structure, Content and Meaning of Organizational Networks Peter

Groenewegen, Julie E. Ferguson, Christine Moser, John Mohr, Stephen P. Borgatti, 2017-10-12 This volume explores recent advances in network research strengthening theorizing on social structures and meaning in and between organizational networks The volume will interest researchers seeking to explain organizational phenomena through the analysis of communications and information from archival secondary electronic sources *The Sociological Review*, 1965 **Rules**

and Laws in Sociology Robert Brown, 2023-08-18 Originally published in 1973 this book examines the difficulties which sociologists have in providing useful scientific definitions of terms like prejudice and discrimination The author argues that such notions are essentially dependent on the social policy adopted and that their common misuse by sociologists reflects a deeper confusion that between the sociologist s search for social rules and regularities and their search for social laws The book clarifies the complex and important relationships between a scientific interest in the rule oriented behaviour of people and a scientific interest in social laws about that behaviour It explains how and why so many sociological inquiries lead to the discovery of mere social practices rather than social laws Talcott Parsons Peter Hamilton, 1992 Talcott Parsons 1904 79 is widely regarded as one of the most important sociologists of the twentieth century These four volumes provide an essential guide to the thought and work of this major sociologist Down to Earth Sociology James M. Henslin, 2005 The twelfth edition s new readings include selections on the unspoken rules of social interaction the shocking disparities between upper

and lower class life America's changing attitudes toward work and family and the roles they fulfill and the McDonaldization of American society Together with these essential new articles the selections by Peter Berger Herbert Gans Erving Goffman Donna Eder Zella Luria C Wright Mills Deborah Tannen Barrie Thorne Sidney Katz Philip Zimbardo and many others provide firsthand reporting that gives students a sense of being there Henslin also explains basic methods of social research providing insight into how sociologists explore the social world The selections in Down to Earth Sociology highlight the most significant themes of contemporary sociology ranging from the sociology of gender power politics sports and religion to the contemporary crises of racial tension crime rape poverty and homelessness **Down to Earth Sociology: 14th Edition**

James M. Henslin, 2007-02-13 Presents a selection of forty six readings that provide an introduction to the sociological perspective look at how sociologists conduct research examine the cultural underpinnings of social life and discuss social groups and social structure gender and sexuality deviance and social stratification institutions and change
