Assessment in Perspective Clare Landrigan, Tammy Mulligan, 2013 Assessment is an integral part of instruction For the past decade the focus on assessment particularly via high stakes mandated tests has shifted away from the classroom and left teachers feeling like they are drowning in data Assessment is and needs to be again much more than a number Assessment in Perspective is about moving beyond the numbers and using assessment to find the stories they tell This book helps teachers sort through the myriad of available assessments and use each to understand different facets of their readers It discusses how to use a range of assessment types from reading conference notes and student work to running records and state tests together to uncover the strengths and weaknesses of a reader The authors share a framework for thinking about the purpose method and types of different assessments They also

address the questions they ask when choosing or analyzing assessments What type of tool do we need diagnostic formative or summative formal or informal quantitative or qualitative How do we use multiple assessments together to provide an in depth picture of a reader When and how are we giving the assessment Do we want to be able to compare our readers to a standard score or do we need to diagnose a reader s needs Which area of reading does this tool assess How can we use the information from assessments to inform our instruction What information does a particular assessment tell us and what doesn t it tell us What additional information do we need about a reader to understand his or her learning needs The book emphasizes the importance of triangulating data by using varied sources both formal and informal and across multiple intervals It explains the power of looking at different types of assessments side by side with displays to find patterns or inconsistencies What s more students are included as valuable sources of data Letting students in on the process of assessment is key to helping them set goals monitor their own progress and celebrate growth When assessment is viewed in this way instruction can meet high standards and still be developmentally appropriate

Dorans, Mary Pommerich, Paul W. Holland, 2007-10-15 In their preface to the second edition of Test Equating Scaling and Linking Mike Kolen and Bob Brennan 2004 made the following observation Prior to 1980 the subject of equating was ignored by most people in the measurement community except for psychometricians who had responsibility for equating p vii The authors went on to say that considerably more attention is now paid to equating indeed to all forms of linkages between tests and that this increased attention can be attributed to several factors 1 An increase in the number and variety of testing programs that use multiple forms and the recognition among professionals that these multiple forms need to be linked 2 Test developers and publishers in response to critics often refer to the role of linking in reporting scores 3 The accountability movement and fairness issues related to assessment have become much more visible Those of us who work in this field know that ensuring comparability of scores is not an easy thing to do Nonetheless our customers the test takers and score users either assume that scores on different forms of an assessment can be used interchangeably or like the critics above ask us to justify our comparability assumptions And they are right to do this After all the test scores that we provide have an impact on decisions that affect people's choices and their future plans From an ethical point of view we are obligated to get it right **Essentials of Response to Intervention** Amanda M. NWEA FAQ Northwest Evaluation Association,2015 Northwest Evaluation Association NWEA conducts norming studies every several years to provide the best and most up to date information we can about student achievement and growth to better support educational decision making It is an important part of our commitment to our partners The most recent NWEA norms were released in July 2015 Just as we expect student performance to change with time norms of student performance will change correspondingly For 2015 several factors may have influenced how the US school age population performed on Measures of Academic Progress MAP assessments of language usage mathematics and reading over the 2011 12 2012 13 and 2013 14 school years Prominent among these possible factors are the introduction of Common Core instruction and Common Core versions of MAP But as with all empirical studies changes in scope and data necessitated changes in statistical design and analyses The methodological improvements introduced in the 2015 norms have resulted in a set of norms that are more representative of the US school age population than previous NWEA norms Methodological changes involved differences in the way post stratification weights were developed and the way growth was modeled Details of these changes are addressed more thoroughly in the 2015 Norms Study As a result of the improved methodology partners can expect some differences from previous norms as explained below
