

Exercise 14

The importance of penicillium notatum

Penicillium is an important genus of phylum ascomycota, found in the natural environment as well as in food and drug production. Some members of the genus produce penicillin, a molecule used as an antibiotic that kills or stops the growth of certain kinds of bacteria inside the body.

Food chain

The importance of the fungi in the food chain

In food chains, fungi act as decomposers, also called saprotrophs, which recycle nutrients in an ecosystem. Without fungi, forest floors would be covered in plant debris and animal carcasses; similarly other ecosystems would have a vast amount of waste piled up. Fungi break down plant components like lignin and cellulose, so they are particularly important in woody ecosystems. They also break down surface waste and release nitrogen back into the soil in the form of ammonium nitrate, a nutrient that plants need for survival.

Liu,2009-05-01 For many people a high standard for student learning is desirable This is what underlies current standard based science education reforms around the world As someone who was born and brought up in a less privileged home and educated in a resource limited school environment in a developing country I always had to study hard to meet various

standards from elementary to high school to university My first book in English published over 10 years ago Liu X 1996 Mathematics and Science Curriculum Change in the People's Republic of China Lewiston NY The Edwin Mellen Press provided me an opportunity to examine standards i.e Chinese national science teaching syllabi from a historical and political point of view I argued that standards are developed for particular political agendas in order to maintain the privileged position of certain groups i.e urban residents in a society at expenses of others i.e rural residents Thus underneath standards is systematic discrimination and injustice Since then I have had opportunities to study the issue of standards in much more breadth and depth This book Linking Competence to Opportunities to Learn Models of Competence and data mining provides me an opportunity to examine standards from a different perspective opportunity to learn
