Theory and Practice Harm Jan Smid,2022-12-16 This book describes and analyses the history of Dutch mathematics education from the point of view of the changing motivations behind the teaching of mathematics over a 200 year period During the course of the 19th century mathematics in the Netherlands developed from a topic for practitioners into a school topic that was taught to almost all pupils of secondary education As mathematics teaching gradually lost its practical

orientation and became more and more motivated on the basis of its supposed formative value the HBS Hogere Burgerschool the Dutch variant of the German Realschule became the dominant school of thought for mathematics pedagogy This book examines the gradual development of the field culminating in the country wide adoption of Realistic Mathematics Education as the new method of mathematics teaching This book is important for anyone who is interested in the history of mathematics education It provides an interesting perspective on the development of mathematics education in a country that in many aspects went its own way Nucleic Acid Photophysics and Photochemistry Spiridoula Matsika, Andrew H. Marcus, 2024-11-16

This volume focuses on recent advancements in our current understanding of nucleic acid photochemistry and its relationship to biologically relevant phenomena Understanding the photophysical properties of nucleic acids is an area of longstanding and active research Over the years the field has greatly benefitted from steady advances in spectroscopic techniques and computational methods to study molecular excited states which have facilitated detailed studies of the behavior of nucleic acids and their components after they absorb light Experiments performed on ultrafast time scales femtoseconds picoseconds have permitted the accurate determination of excited state lifetimes while computational studies have provided detailed microscopic information about the mechanisms involved As our understanding of the fundamental photophysics of nucleic acids has advanced current studies now focus on systems of higher complexity and introduce novel optical techniques to investigate the interactions between nucleic acids and proteins Spectroscopic studies of nucleic acids particularly nucleic acid constructs labeled with optical probes can yield richly detailed information important to molecular biology biochemistry and biophysics This book is a must read for anyone interested in the photophysical properties of nucleic acids and their role in biologically relevant phenomena **The Claustrium: charting a way forward for the brain's most mysterious nucleus** Ariel Y. Deutch, Brian N. Mathur, 2015-09-09

The claustrum is a long band like grey matter structure situated in the ventrolateral telencephalon of most if not all mammalian brains Due to its shape and close proximity to white matter structures and insular cortex the anatomy and behavioral relevance of the claustrum have proven difficult to study As a result disagreements in the literature exist over ontogeny phylogeny anatomical boundaries and connectivity Despite this it is generally regarded that the claustrum contains excitatory projection neurons that reciprocally connect to most regions of the cerebral cortex a feature that has fostered varying hypotheses as to its function These hypotheses propose multisensory integration coordination of cortical activity for the generation of conscious percepts or saliency filtration The articles of this e book consider the historical and recent highlights in claustrum structure hodology and function and seek to provide a compelling way forward for this hidden nucleus **McGraw-Hill Education PSAT/NMSQT** () (Fang Ting) Wang, Mercedes L. What Mathematics Do Students Know and How is that Knowledge Changing? Peter Kloosterman, Doris Mohr, Crystal Walcott, 2015-09-01 This volume is intended for researchers curriculum developers policy makers and classroom teachers who want comprehensive information on what students at grades 4 8 and 12 the grades assessed by NAEP can and cannot do in mathematics After two introductory chapters on the design of NAEP the volume contains a chapter on the challenges in analyzing NAEP data at the item level followed by five chapters that report 2005 through 2013 student performance on specific assessment items These chapters are organized by content area and then by topic e g understanding of place value knowledge of transformations ability to use metric and U S systems of measurement and thus provide baseline data on the proportion of students who are able to complete the mathematics tasks currently used in the upper elementary middle and high school mathematics curriculum Additional chapters focus on student reasoning U S performance on international assessments and using construct analysis rather than percent correct on clusters of items to understand student knowledge on specific mathematics topics Several themes emerge from the volume One is

that while the rate of improvement in mathematics learning in grades 4 and 8 has slowed in recent years it has slowed more on some topics than others Another is that relatively minor changes in wording can have significant effects on student performance and thus it is difficult to be specific about what students can do without knowing exactly what questions they were asked A third theme is that changes in performance over time can sometimes but not always be understood in terms of what students are taught For example there were substantial gains on several grade 4 items requiring understanding of fractions and that is probably because the amount of instruction on fractions in grades 3 and 4 has been increasing In contrast while relatively few twelfth grade students have ever been good at factoring trinomials performance on this skill seems to be decreasing This suggests that while more students are completing advanced mathematics courses in high school these courses are not helping in the area of factoring trinomials Finally there are limitations to using NAEP as a measure of student performance on the Common Core State Standards To the extent that NAEP can be used however the NAEP data show a substantial gap between expectations and performance
