2014 Geography Grade 11 Memo:

Mobility and Migration Choices Martin van der Velde, Ton van Naerssen, 2016-03-03 The crossing of national state borders is one of the most discussed issues of contemporary times and it poses many challenges for individual and collective identities This concerns both short distance mobility as well as long distance migration Choosing to move or not across international borders is a complex decision involving both cognitive and emotional processes This book tests the approach that three crucial thresholds need to be crossed before mobility occurs the individual's mindset about migrating the choice of destination and perception of crossing borders to that location and the specific routes and spatial trajectories available to get there Thus both borders and trajectories can act as thresholds to spatial moves The threshold approach with its focus on processes affecting whether when and where to move aims to understand the decision making process in all its dimensions in the hope that this will lead to a better understanding of the ways migrants conceive perceive and undertake their transnational journeys This book examines the three constitutive parts discerned in the cross border mobility decision making process people borders and trajectories and their interrelationships Illustrated by a global range of case studies it demonstrates that the relation between the three is not fixed but flexible and that decision making contains aspects of belonging instability security and volatility affecting their mobility or immobility

The Meritocracy Trap Daniel Markovits, 2019-09-10 This book flips your world upside down Daniel Markovits argues that meritocracy isn't a virtuous efficient system that rewards the best and brightest Instead it rewards middle class families who can afford huge investments in their children's education Frightening eye opening stuff The Times Books of the Year Even in the midst of runaway economic inequality and dangerous social division it remains an axiom of modern life that meritocracy reigns supreme and promises to open opportunity to all The idea that reward should follow ability and effort is so entrenched in our psyche that even as society divides itself at almost every turn all sides can be heard repeating meritocratic notions Meritocracy cuts to the heart of who we think we are But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that The Meritocracy Trap prosecutes with rare force comprehensive research and devastating persuasion Daniel Markovits a law professor trained in philosophy and economics is better placed than most to

puncture one of the dominant ideas of our age Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within as well as how we can take the first steps towards a world that might afford us both prosperity and dignity

scales to develop political blocs What injustices are perpetrated or more hopefully redressed in this process The book consisting of contributions from anthropologists geographers and cultural studies scholars explores theoretical issues around contested temporal and spatial scales and around variations in scale from the body to the global Part I focuses on bodies in motion entangled in battles over new boundaries and political coalitions and the ways in which migrants and refugees are disrupted by intersecting time scales Part II on the nation state addresses the shifting responsibilities assigned by law at different historical moments and the impact of global energy trade on national austerity policies Part III on rescaling sovereignty discusses the misleading media discourse on Brexit and reconstructs the class bases of the move to the Right in Eastern Europe that threaten the EU Part IV on the histories of changing scales of movements revisits historical debates on uneven and combined development and sets out the transnational labor movements of the eighteenth and nineteenth century Atlantic which prefigure contemporary struggles of labor in a world which is still one of uneven and combined capitalist development Finally Part V considers ways in which some social movements are constrained by scale while others reshape parties and traverse nations in their efforts to build class alliances and political blocs

Toxic Communities Dorceta Taylor, 2014-06-20 Uncover the systemic problems that expose poor communities to environmental hazards From St Louis to New Orleans from Baltimore to Oklahoma City there are poor and minority neighborhoods so beset by pollution that just living in them can be hazardous to your health Due to entrenched segregation zoning ordinances that privilege wealthier communities or because businesses have found the paths of least resistance there are many hazardous waste and toxic facilities in these communities leading residents to

experience health and wellness problems on top of the race and class discrimination most already experience Taking stock of the recent environmental justice scholarship Toxic Communities examines the connections among residential segregation zoning and exposure to environmental hazards Renowned environmental sociologist Dorceta Taylor focuses on the locations of hazardous facilities in low income and minority communities and shows how they have been dumped on contaminated and exposed Drawing on an array of historical and contemporary case studies from across the country Taylor explores controversies over racially motivated decisions in zoning laws eminent domain government regulation or lack thereof and urban renewal She provides a comprehensive overview of the debate over whether or not there is a link between environmental transgressions and discrimination drawing a clear picture of the state of the environmental justice field today and where it is going In doing so she introduces new concepts and theories for understanding environmental racism that will be essential for environmental justice scholars A fascinating landmark study Toxic Communities greatly contributes to the study of race the environment and space in the contemporary United States

Fighting the Great War at Sea Norman Friedman, 2014-10-22 The overriding image of the First World War is the bloody stalemate of the Western Front but although much of the action did occur on land the overall shape of the war _ even the inevitability of British participation _ arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in the desperate German attempts to deal with the American industrial threat which ultimately levered the United States into the war and thus a consequence of British sea control rn This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing it describes rapid wartime changes not only in ship and weapon technology but also in the way naval warfare was envisaged and fought Combat produced many surprises some like the impact of the mine and torpedo are familiar but this book also brings to light many previously unexplored subjects like creative new tactical practices and improved command and control rn The contrast between expectation and reality had enormous consequences not only for the course of the war but also for the way navies developed afterwards This book melds strategic technical and tactical aspects to reveal the First World War from a fresh perspective but also demonstrates how its perceived lessons dominated the way navies prepared for the Second
