Budget of the United States Government United States. Office of Management and Budget, 2015 **Science Teaching in Schools** Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee s

report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14 19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools

Nations Apart Radka ^D%Sustrová,2024-02-16 Nations Apart reconsiders the Nazi occupation of Bohemia and Moravia during World War II The dismemberment of Czechoslovakia after the 1938 Munich Agreement is typically recalled in Czech historical memory as the beginning of a period of humiliation occupation and resistance Against this narrative of victimhood %Sustrov argues that the Nazi Protectorate of Bohemia and Moravia witnessed the unexpected expansion of the Czech welfare state a process driven by local nationalisms and which in turn contributed inadvertently to the stability of Nazi governance Through extensive research in Czech German and Swiss archives Nations Apart demonstrates that ethnically exclusive Czech national ideology dominated politics and everyday life during Nazi rule Illustrating similarities between the wartime Protectorate and the occupation regimes in Western Europe %Sustrov sheds new light on occupied societies during WWII and on the ambiguous origins of welfare states in post war Europe

The Future of the Professions Richard Susskind,Daniel Susskind,2022-03-31 This book predicts the decline of today s professions and introduces the people and systems that will replace them In an internet enhanced society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century The Future of the Professions explains how increasingly capable technologies from telepresence to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone often at no or low cost and without face to face interaction The authors challenge the grand bargain the arrangement that grants various monopolies to today s professionals They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few In their place they propose five new models for producing and distributing expertise in society The book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than

human beings at most tasks With a new preface exploring recent critical developments this updated edition builds on the authors groundbreaking research into more than a dozen professions Illustrated with numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century **The Bleeding Edge** Bob Hughes,2016-10-17 Capitalism likes us to believe in the steady inevitable march of progress from the abacus to the iPad But the historical record tells of innumerable roads not taken all of which could have led to better more equal worlds and still can Academic and activist Bob Hughes puts flesh on the bones of the idea that another world is possible using as evidence the technology that capitalism claims as quintessentially its own the computer in all its forms Contrary to popular belief capitalism does not do innovation well instead suppressing or appropriating it This book shows that great innovations have never emerged from capitalism per se but always from the utopian moments that occur behind the capitalist s back And when it does embrace an innovation the results are often the diametric opposite of what the innovators intended In this thorough and meticulous work Hughes argues that if we only prioritized equality over materialism then superior and more diverse technologies would emerge leading to a richer more sustainable world Bob Hughes is an academic activist and author Formerly he taught electronic media Oxford Brookes University and now spends his time researching and campaigning against inequality He is author of Dust or Magic a book for digital multimedia workers about how people do good stuff with computers He is a member of No One is Illegal which campaigns for the total abolition of immigration controls for whom he has written many articles **Prisons, Punishment, and the Family** Rachel Condry,Peter Scharff Smith,2018 Every year millions of families are affected by the imprisonment of a family member Children of imprisoned parents alone can be counted in millions in the USA and in Europe It is a bewildering fact that while we have had prisons for centuries and the deprivation of liberty has been a central pillar in the Western mode of punishment since the early nineteenth century we have only relatively recently embarked upon a serious discussion of the severe effects of imprisonment for the families and relatives of offenders and the implications this has for society This book draws together some of the excellent research that addresses the impact of criminal justice and incarceration in particular upon the families of offenders It assembles examples of recent and ongoing studies from eight different countries in order to not only learn about the secondary effects and collateral consequences of imprisonment but also to understand what the experiences and lived realities of prisoners families means for the sociology of punishment and our broader understanding of criminal justice systems While punishment and society scholarship has gained significant ground in recent years it has often remained silent on the ways in which the families of prisoners are affected by our practices of punishment This book provides evidence of the importance of including families within this scholarship and explores themes of legitimacy citizenship human rights marginalization exclusion and inequality **Social Work, White Supremacy, and Racial Justice** Laura S. Abrams,Sandra Edmonds Crewe,Alan J. Dettlaff,James Herbert Williams,2023 This volume offers an examination of the history of racism and White supremacy in the

profession of social work current efforts to address and repair the harms caused by racism and White supremacy within the profession and forward thinking strategies for social work to be part of a broader societal movement to achieve an anti racist future

All We Want Michael Harris,2025-04-01 Our lives are defined by a story of endless growth and consumption Now a climate crisis demands that we change Can we write new stories In *All We Want* award winning author Michael Harris dismantles our untenable consumer culture and delivers surprising heartwarming alternatives Drawing on the wisdom of philosophers scientists and artists Harris uncovers three realms where humans have always found deeper meaning the worlds of Craft the Sublime and Care Past attempts to blunt our impact on the environment have simply redirected our consumption we bought fuel efficient cars and canvas tote bags We cannot however buy our way out of this crisis We need instead compelling new stories about life s purpose Part meditation and part manifesto *All We Want* is a blazing inquest into the destructive and unfulfilling promise of our consumer society and a roadmap toward a more humane future

The Schenley Experiment Jake Oresick,2017-04-14 The Schenley Experiment is the story of Pittsburgh s first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before *Brown v Board of Education* Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace s reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools

A Nation of Neighborhoods Benjamin Looker, 2015-10-22 Despite the pundits who have written its epitaph and the latter day refugees who have fled its confines for the half acre suburban estate the city neighborhood has endured as an idea central to American culture In A Nation of Neighborhoods Benjamin Looker presents us with the city neighborhood as both an endless problem and a possibility Looker investigates the cultural social and political complexities of the idea of neighborhood in postwar America and how Americans grappled with vast changes in their urban spaces from World War II to the Reagan era In the face of urban decline competing visions of the city neighborhood's significance and purpose became proxies for broader debates over the meaning and limits of American democracy By studying the way these contests unfolded across a startling variety of genres Broadway shows radio plays urban ethnographies real estate documents and even children's programming Looker shows that the neighborhood ideal has functioned as a central symbolic site for advancing and debating theories about American national identity and democratic practice

Interaction in Educational Domains

Kirsi Tirri, Elina Kuusisto, 2013-11-19 In this volume we take a holistic approach to education viewing human beings as lifelong learners who need interaction in all educational domains cognitive affective psychomotor to actualize their full potential The chapters are based on presentations given at the 2012 conference of the Finnish Educational Research Association FERA whose theme was Interaction in Educational Research Prof David Clarke from the University of Melbourne in Australia and the conference's keynote speaker opens our symposium with a discussion of international comparative research in educational interaction by constructing and concealing differences The chapters that follow arranged in three parts deal with interaction in cognitive affective and psychomotor domains In Part I theoretical and philosophical approaches to interaction are examined through ontological epistemological and semiotic perspectives Part II presents a series of empirical studies on educational interaction Together these show regional differences in cognitive and psychomotor learning

outcomes the importance of academic emotions in learning cultural aspects in understanding the visual arts and interactive learning for gifted science students Part III introduces three programs that promote educational interaction one enhances teacher education with interdisciplinary integration another explores the benefits of Finnish Russian cooperation and a third uses musical concerts as an interactive tool for special education All of the chapters contribute to the current research and discussion on learning and interaction In this field inquiries need to be carried out in different learning domains and in various cultural contexts In particular cross cultural comparisons are useful in validating the findings of empirical studies and testing the culture dependent and culture invariant dimensions of educational interaction *English Mechanic and Mirror of Science and Art* ,1870 *Crime, Poverty and Survival in the Middle East and North Africa* Stephanie Cronin,2019-11-28 The concept of the dangerous classes was born in a rapidly urbanizing and industrializing nineteenth century Europe It described all those who had fallen out of the working classes into the lower depths of the new societies surviving by their wits or various amoral disreputable or criminal strategies This included beggars and vagrants swindlers pickpockets and burglars prostitutes and pimps ex soldiers ex prisoners tricksters drug dealers the unemployed or unemployable indeed every type of the criminal and marginal This book examines the dangerous classes in the Middle East and North Africa their lives and the strategies they used to avoid evade cheat placate or occasionally resist the authorities Chapters cover the narratives of their lives their relationship with respectable society their political inclinations and their role in shaping systems and institutions of discipline and control and their representation in literature and in popular culture The book demonstrates the liminality of the dangerous classes and their capacity for re invention It also indicates the sharpening relevance of the concept to a Middle East and North Africa now in the grip of an almost permanent sense of crisis its younger generations crippled by a pervasive sense of hopelessness prone to petty crime and vulnerable to induction as foot soldiers into drug and people smuggling petty gangsterism and jihadism
