Meritocracy Trap Daniel Markovits,2019-09-10 This book flips your world upside down Daniel Markovits argues that meritocracy isn't a virtuous efficient system that rewards the best and brightest Instead it rewards middle class families who can afford huge investments in their children's education Frightening eye opening stuff The Times Books of the Year Even in the midst of runaway economic inequality and dangerous social division it remains an axiom of modern life that meritocracy reigns supreme and promises to open opportunity to all The idea that reward should follow ability and effort is so entrenched in our psyche that even as society divides itself at almost every turn all sides can be heard repeating meritocratic notions Meritocracy cuts to the heart of who we think we are But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that The Meritocracy Trap prosecutes with rare force comprehensive research and devastating persuasion Daniel Markovits a law professor trained in philosophy and economics is better placed than most to puncture one of the dominant ideas of our age Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within as well as how we can take the first steps towards a world that might afford us both prosperity and dignity Handbook on Urban Social Policies Kazepov,

Yuri,Barberis, Eduardo,Cucca, Roberta,Mocca , Elisabetta,2022-07-22 The importance of subnational welfare measures and their complex embeddedness in wider multilevel governance systems has often been underplayed in both urban studies and social policy analysis This Handbook gives readers the analytical tools to understand urban social policies in context and bridges the gap in research **MGMT4** Chuck Williams,Alan McWilliams,Rob Lawrence,Wahed Waheduzzaman,2019-09-09 MGMT4 is the fourth Asia Pacific edition of this innovative approach to teaching and learning the principles of management Concise yet complete coverage of the subject supported by a suite of online learning tools and teaching material equips students and instructors with the resources required to successfully undertake an introductory management course This highly visual and engaging resource is now available on the MindTap eLearning platform allowing for seamless delivery both online and in class With the Cengage Mobile app students can take course materials with them anytime anywhere New print

House of Lords,1847 *Neighbourhood Policy and the Construction of the European External Borders* Filippo Celata,Raffaella Coletti,2015-06-11 This book looks both backward and forward with regard to the European Union s political strategies towards its neighbouring countries By bringing together the perspectives of critical geopolitics policy studies and border studies it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU s external frontiers Is the EU committed to promoting integration in a wider European space or is a fortress Europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders The book aims to problematize this question by showing how the EU s external policies are based on a mixture of openness and closure inclusion and exclusion cooperation and securitisation The European Neighbourhood Policy is a controversial strategy where regionalization and bordering homogenisations and differentiations centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective mobile and fragmented border A specific focus is devoted to the diversity of geo strategies the EU is pursuing in its neighbouring countries and regions macro regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players
