Jacobs,2015-12-16 Over the past forty years state provincial and local governments in the United States and Canada have provided foreign automakers with approximately 4 80 billion in incentives in order to lure light vehicles assembly plants to their areas This has included tax abatements infrastructure construction land giveaways job training programs and other subsidies As of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed North America Despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America each has followed its own specific historical development path and has created its own unique growth trajectory This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or Canada through early 2015 In addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada This includes the first foreign automaker to build its cars in the United States De Dion Bouton of France in July 1900 the early 20th Century endeavors of Fiat Mercedes and Rolls Royce and the present day hopes of Chinese and Indian automakers In the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide **Right of Way** Angie Schmitt,2020-08-27 The face of the pedestrian safety crisis looks a lot like Ignacio Duarte Rodriguez The 77 year old grandfather was struck in a hit and run crash while trying to cross a high speed six lane road without crosswalks near his son s home in Phoenix Arizona He was one of the more than 6 000 people killed while walking in America in 2018 In the last ten years there has been a 50 percent increase in pedestrian deaths The tragedy of traffic violence has barely registered with the media and wider culture Disproportionately the victims are like Duarte

Rodriguez immigrants the poor and people of color They have largely been blamed and forgotten In Right of Way journalist Angie Schmitt shows us that deaths like Duarte Rodriguez s are not unavoidable accidents They don t happen because of jaywalking or distracted walking They are predictable occurring in stark geographic patterns that tell a story about systemic inequality These deaths are the forgotten faces of an increasingly urgent public health crisis that we have the tools but not the will to solve Schmitt examines the possible causes of the increase in pedestrian deaths as well as programs and movements that are beginning to respond to the epidemic Her investigation unveils why pedestrians are dying and she demands action Right of Way is a call to reframe the problem acknowledge the role of racism and classism in the public response to these deaths and energize advocacy around road safety Ultimately Schmitt argues that we need improvements in infrastructure and changes to policy to save lives Right of Way unveils a crisis that is rooted in both inequality and the undeterred reign of the automobile in our cities It challenges us to imagine and demand safer and more equitable cities where no one is expendable
