Chris Arthur

2014 November Grade 12 Business Studies Final Examination Paper:

Financial Literacy Education Chris Arthur, 2012-10-13 Consumer financial literacy education often appears as a helpful commonsense solution to neoliberalism and the individualization of responsibility for economic risk. However, in Financial Literacy Education, Neoliberalism, the Consumer, and the Citizen, this particular literacy is argued to be both ineffective and unjust. Socially created poverty, unemployment, and economic insecurity require more than individual consumer solutions; they require collective responses by engaged critical citizens. Utilizing concepts from Marx, Foucault, Bourdieu, and Baudrillard, this book challenges those who claim that there is no alternative to neoliberal insecurity and reduce education to a consumerist training of entrepreneurial consumer citizens who can continually invest in themselves and the market. Through an analysis of consumer financial literacy education's present and historical supports as well as its likely effects, this book argues that the choice before us is not financial illiteracy or financial literacy. Rather, the choice is between subjugation to the requirements of perpetual competition or overcoming alienation, insecurity, and exploitation. The critical financial literacy education outlined at the end of this book supports this. This book will appeal to those interested in understanding the conditions of our freedom in an increasingly financialized world: critical educators, philosophers, and sociologists of education and financial literacy researchers.

Dark Data David J. Hand, 2022-02-15 Data describe and represent the world. However, no matter how big they may be, data sets don't indeed capture everything. Data are measurements, and as such, they represent only what has been measured. They don't necessarily capture all the information that is relevant to the questions we may want to ask. If we do not take into account what may be missing, unknown in the data we have, we may find ourselves unwittingly asking questions that our data cannot actually address, come to mistaken conclusions, and make disastrous decisions. In this book, David Hand looks at the ubiquitous phenomenon of missing data. He calls this dark data, making a comparison to dark matter, i.e., matter in the universe that we know is there but which is invisible to direct measurement. He reveals how we can detect when data is missing, the types of settings in which missing data are likely to be found, and what to do about it. It can arise for many reasons, which themselves may not be obvious: for example, asymmetric information in wars, time delays in financial trading, dropouts in clinical trials, deliberate selection to enhance apparent performance in hospitals, policing, and schools, etc. What becomes clear is that measuring and collecting more and more data, big data, will not necessarily lead us to better understanding or to better decisions. We need to be vigilant to what is missing or unknown in our data so that we can try to control for it. How do we do that? We can be alert to the causes of dark data, design better data collection strategies that

sidestep some of these causes and we can ask better questions of our data which will lead us to deeper insights and better decisions An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Marijuana Federalism Jonathan H. Adler, 2020-03-17 On marijuana there is no mutual federal state policy will this cause federalism to go up in smoke More than one half the 50 states have legalized the use of marijuana at least for medical purposes and about a dozen of those states have gone further legalizing it for recreational use Either step would have been almost inconceivable just a couple decades ago But marijuana remains an illegal controlled substance under a 1970 federal law so those who sell or grow it could still face federal prosecution How can state and federal laws be in such conflict And could federal law put the new state laws in jeopardy at some point This book an edited volume with contributions by highly regarded legal scholars and policy analysts is the first detailed examination of these and other questions surrounding a highly unusual conflict between state and federal policies and laws Marijuana Federalism surveys the constitutional issues that come into play with this conflict as well as the policy questions related to law enforcement at the federal versus state levels It also describes specific areas such as banking regulations in which

federal law has particularly far reaching effects Readers will gain a greater understanding of federalism in general including how the division of authority between the federal and state governments operates in the context of policy and legal disputes between the two levels This book also will help inform debates as other states consider whether to jump on the bandwagon of marijuana legalization *American Sheep Breeder and Wool Grower* ,1911 *Self-regulated Learning in Online Settings*
