Push Factors and Capital Flows to Emerging Markets Mr.Eugenio Cerutti,Mr.Stijn Claessens,Mr.Damien Puy,2015-06-22 This paper analyzes the behavior of gross capital inflows across 34 emerging markets EMs We first confirm that aggregate inflows to EMs co move considerably We then report three findings i the aggregate co movement conceals significant heterogeneity across asset types as only bank related and portfolio bond and equity inflows do co move ii while global push factors in advanced economies mostly explain the common dynamics their relative importance varies by type of flow and iii the sensitivity to common dynamics varies significantly across borrower countries with market structure characteristics especially the composition of the foreign investor base and the level of liquidity rather than borrower country s institutional fundamentals strongly affecting sensitivities Countries relying more on international funds and global banks are found to be more sensitive to push factors Our findings suggest that EMs need to closely monitor their lenders and investors to assess their inflow exposures to global push factors

Regional review on status and trends in aquaculture development in Asia and the Pacific - 2020 ?De Silva, S.S., Yuan, D.,2022-02-21 The Asia Pacific region is remarkably diverse and wide ranging geographically in its flora and fauna culturally institutionally and economically The region includes the two most populous countries in the world China and India a greater part of the Asian continent the Australian continent and many small islands mostly in the Pacific Ocean which are some of the smallest island nations in the world Fisheries and aquaculture are socio economically important sectors to most nations in the Asia Pacific region and most nations in the region have high rates of fish consumption mostly sourced from aquaculture although the small island nations depend to a greater extent on capture fisheries This review entails analyses of the aquaculture sector in Asia Pacific including the status and trends progress made in achieving sustainable development salient challenges issues and anticipated future development Status and trends are based on data extracted from the FAO Fishery and Aquaculture Statistics FAO 2020a FAO 2020b unless stated otherwise and are mostly for the period from 2008 to 2018 and occasionally for the period from 1990 to 2018 for relevant historical comparison and longer term contextual analyses

The Political Economy of Monetary Solidarity Waltraud Schelkle,2017 Creating the European monetary union between diverse and unequal nation states is arguably one of the biggest social experiments in history This book offers an explanation of how the euro experiment came about and was sustained despite a severe crisis and provides a comparison with the monetary

financial history of the US The euro experiment can be understood as risk sharing through a currency that is issued by a supranational central bank A single currency shares liquidity risks by creating larger markets for all financial assets A single monetary policy responds to business cycles in the currency area as a whole rather than managing the path of one dominant economy Mechanisms of risk sharing become institutions of monetary solidarity if they are consciously maintained but they will periodically face opposition in member states This book argues that diversity of membership is not an economic obstacle to the success of the euro as diversity increases the potential gains from risk sharing But political cooperation is needed to realize this potential and such cooperation is up against collective action problems which become more intractable as the parties become more diverse Hence risk sharing usually comes about as a collective by product of national incentives This political economic tension can explain why the gains from risk sharing are not more fully exploited both in the euro area and in the US dollar area This approach to monetary integration is based on the theory of collective action when hierarchy is not available as a solution to inter state cooperation The theory originates with Keohane and Ostrom 1995 and it is applied in this book taking into account the latest research on the inherent instability of financial market integration

Enhancing Tax Capacity Jean-Marc B. Atsebi,Nikolay Gueorguiev,Manabu Nose,2025-10-24 Building on previous studies we propose a robust estimation strategy to uncover the causal effects of tax administration strength on tax revenue in 121 countries over the period 2014 2022 Our novel approach utilizes a unique expert survey to construct an Operational Strength Index of tax administration using the International Survey on Revenue Administration ISORA and employs an instrumental variable strategy based on the IMF Fiscal Affairs Department s Capacity Development programs We find that strengthening tax administration significantly boosts tax revenue particularly in emerging and developing economies and especially in countries with lower levels of informality stronger institutions and higher financial development These findings carry important policy implications for governments and development partners aiming to enhance tax administration capacity and strengthen public finances overall

Pediatric Critical Care in Resource-Limited Settings Krishan Chugh,Ndidi Musa,Phuc Huu Phan,Srinivas Murthy,Yves Ouellette,2019-07-11 Millions of children are dying each year with preventable and reversible critical illness including circulatory shock and respiratory failure According to the World Health Organization in 2015 the under five mortality rate in low income countries was 76 deaths per 1000 live births about 11 times the average rate in high income countries 7 deaths per 1000 live births There is limited data about the nature of the delivery of critical care in resource limited regions The care of critically ill children in low resource settings is challenging contributing factors include limitations in the existing infrastructure lack of resources and low numbers of appropriately trained healthcare workers Meeting these challenges requires clinical evidence pertinent to the local settings adequate number of well trained personnel quality improvement activities and the ongoing development of preventative measures In addition approaches to prevent worsening critical illness in at risk hospitalized patients are needed We are presenting 15 state of the art

manuscripts from international experts from all settings involved in the care of critically ill children in resource limited settings This collection of manuscripts covers topics including education research clinical experience and infectious diseases We hope that we are providing a window into the future of critical care delivery for all children around the world **What**

Slice of the Pie? The Corporate Bond Market Boom in Emerging Economies Ms.Diana Ayala Pena,Milan

Nedeljkovic,Christian Saborowski,2015-07-07 This paper studies the determinants of shifts in debt composition among EM non financial corporates We show that institutions and macro fundamentals create an enabling environment for bond market development During the recent boom episode however global cyclical factors accounted for most of the variation of bond shares in total corporate debt The sensitivity to global factors appears to vary with relative bond market size which we interpret to be associated with liquidity and easy entry and exit rather than local fundamentals Foreign bank linkages help explain why bond markets increasingly substituted for banks in channeling liquidity to EMs Our results highlight the risk of capital flow reversal in EMs that benefited from the upturn in the global financial cycle mostly due to their liquid markets rather than strong fundamentals **New Jersey Register** ,2016 *Economics of Monetary Union* Paul de Grauwe,2018

The twelfth edition of *Economics of Monetary Union* provides a concise analysis of the theories and policies relating to monetary union The author addresses current issues surrounding the Eurozone including a critical discussion of the costs and benefits of possible exits by its member countries an analysis of the role of the ECB as new single supervisor and detail on the sovereign debt crisis In Part One the author examines the implications of adopting a common currency assessing the benefit to each country from being a member of the Eurozone whilst also questioning whether other parts of the world would gain from monetary unification Part Two of the book looks at the problems of running a monetary union by analysing Europe s experience and the issues faced by the European Central Bank The book is accompanied by online resources that feature For students Links to data sources Essay questions Web links Paul De Grauwe on Twitter For Lecturers PowerPoint slides Instructor s manual
