we need an opportunity to reflect on the effective design and delivery of curriculum Should the undergraduate student body play more of a role in the design of the curriculum or should the undergraduate student body play more of a role in the design of the curriculum or should they remain the recipients of a programme that has been designed by subject specialists The scope of this book is wide but it brings the design and delivery of higher education programmes under the empirical gaze of educational psychology That is to say all chapters centre on the impact of higher educational programmes on the student teacher relationship student learning achievement and identity It is therefore crucial to explore the psychological impact of higher education institutions and how these can then be used to inform innovative educational practice and policy

When Things Don't Fall Apart Ilene Grabel, 2019-08-06 An account of the significant though gradual uneven disconnected ad hoc and pragmatic innovations in global financial governance and developmental finance induced by the global financial crisis In *When Things Don't Fall Apart* Ilene Grabel challenges the dominant view that the global financial crisis had little effect on global financial governance and developmental finance Most observers discount all but grand systemic ruptures in institutions and policy Grabel argues instead that the global crisis induced inconsistent and ad hoc discontinuities in global financial governance and developmental finance that are now having profound effects on emerging market and developing economies Grabel's chief normative claim is that the resulting incoherence in global financial governance is productive rather than debilitating In the age of productive incoherence a more complex dense fragmented and pluripolar form of global financial governance is expanding possibilities for policy and institutional experimentation policy space for economic and human development financial stability and resilience and financial inclusion Grabel draws on key theoretical commitments of Albert Hirschman to cement the case for the productivity of incoherence Inspired by Hirschman Grabel demonstrates that meaningful change often emerges from disconnected erratic experimental and inconsistent adjustments in institutions and policies as actors pragmatically manage in an evolving world Grabel substantiates her claims with empirically rich case studies that explore the effects of recent crises on networks of financial governance such as the G 20 transformations within the IMF institutional innovations in liquidity support and project finance from the national to the transregional levels and the rebranding of capital controls Grabel concludes with a careful examination of the opportunities and risks associated with the evolutionary transformations underway

Trafficking in Antiracism Lyndsey P. Beutin, 2023-02-27 In *Trafficking in Antiracism* Lyndsey P Beutin analyzes how campaigns to end human trafficking often described as modern day slavery invoke the memory of transatlantic slavery to support positions ultimately grounded in antiracism Drawing on contemporary antitrafficking visual culture and media discourse she shows how a constellation of media philanthropic NGO and government actors invested in ending human trafficking repurpose the history of transatlantic slavery and abolition in ways that undermine contemporary struggles for racial justice and slavery reparations The recurring narratives images and figures such as slavery in Africa Arab slave traders and Black incapacity for self governance discursively turn Black people across the diaspora into the enslavers of the past and present in place of white Americans and Europeans Doing so Beutin contends creates a rhetorical defense against being held liable for slavery's dispossession and violence Despite these implications Beutin demonstrates that antitrafficking discourse remains popular and politically useful for former slaving nations and their racial beneficiaries because it refashions historic justifications for

white supremacy into today's abolition of slavery *Intersections of Mothering* Carole Zufferey, Fiona Buchanan, 2019-12-06

The Creation of Wealth and Poverty Hassan Bougrine, 2016-11-25 *The Creation of Wealth and Poverty* is a study of the means and ways by which wealth and poverty are created in both developed and developing countries It puts a particular emphasis on the role played by economic policy in shaping the stratification of modern societies through specific programmes dealing with issues of job creation poverty and environmental degradation This book is concerned with the social effects of the ongoing crisis in finance development and the environment By focusing on the political legal and financial institutions that govern society and the economy the book provides an analysis of wealth and poverty from a historical perspective It shows how economic and social policies of the neoliberal model have led to a rise in unemployment poverty and inequality and therefore made societies more polarized This volume will be of great interest to policymakers academics and students who study political economy development economics and macroeconomics *Dream Hoarders* Richard V. Reeves, 2017-05-23 *Dream Hoarders* sparked a national conversation on the dangerous separation between the upper middle class and everyone else Now in paperback and newly updated for the age of Trump Brookings Institution senior fellow Richard Reeves is continuing to challenge the class system in America In America everyone knows that the top 1 percent are the villains The rest of us the 99 percent we are the good guys Not so argues Reeves The real class divide is not between the upper class and the upper middle class it is between the upper middle class and everyone else The separation of

the upper middle class from everyone else is both economic and social and the practice of opportunity hoarding gaining exclusive access to scarce resources is especially prevalent among parents who want to perpetuate privilege to the benefit of their children While many families believe this is just good parenting it is actually hurting others by reducing their chances of securing these opportunities There is a glass floor created for each affluent child helped by his or her wealthy stable family That glass floor is a glass ceiling for another child Throughout *Dream Hoarders* Reeves explores the creation and perpetuation of opportunity hoarding and what should be done to stop it including controversial solutions such as ending legacy admissions to school He offers specific steps toward reducing inequality and asks the upper middle class to pay for it Convinced of their merit members of the upper middle class believes they are entitled to those tax breaks and hoarded opportunities After all they aren't the 1 percent The national obsession with the super rich allows the upper middle class to convince themselves that they are just like the rest of America In *Dream Hoarders* Reeves argues that in many ways they are worse and that changes in policy and social conscience are the only way to fix the broken system

PostCapitalism Paul Mason, 2015-07-30 From Paul Mason the award winning Channel 4 presenter *Postcapitalism* is a guide to our era of seismic economic change and how we can build a more equal society Over the past two centuries or so capitalism has undergone continual change economic cycles that lurch from boom to bust and has always emerged transformed and strengthened Surveying this turbulent history Paul Mason wonders whether today we are on the brink of a change so big so profound that this time capitalism itself the immensely complex system by which entire societies function has reached its limits and is changing into something wholly new At the heart of this change is information technology a revolution that as Mason shows has the potential to reshape utterly our familiar notions of work production and value and to destroy an economy based on markets and private ownership in fact he contends it is already doing so Almost unnoticed in the niches and hollows of the market system whole swathes of economic life are changing Goods and services that no longer respond to the dictates of neoliberalism are appearing from parallel currencies and time banks to cooperatives and self managed online spaces Vast numbers of people are changing their behaviour discovering new forms of ownership lending and doing business that are distinct from and contrary to the current system of state backed corporate capitalism In this groundbreaking book Mason shows how from the ashes of the recent financial crisis we have the chance to create a more socially just and sustainable global economy Moving beyond capitalism he shows is no longer a utopian dream This is the first time in human history in which equipped with an understanding of what is happening around us we can predict and shape rather than simply react to seismic change

On Unemployment Mark R. Reiff, 2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment

however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book s various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology
