Mathematics, Affect and Learning Peter Grootenboer, Margaret Marshman, 2015-10-17 This book examines the beliefs attitudes values and emotions of students in Years 5 to 8 aged 10 to 14 years about mathematics and mathematics education Fundamentally this book focuses on the development of affective views

and responses towards mathematics and mathematics learning Furthermore it seems that students develop their more negative views of mathematics during the middle school years Years 5 to 8 and so here we concentrate on students in this critical period The book is based on a number of empirical studies including an enquiry undertaken with 45 children in Years 5 and 6 in one school a large scale quantitative study undertaken with students from a range of schools across diverse communities in New Zealand and two related small scale studies with junior secondary students in Australia This book brings substantial empirically based evidence to the widely held perception that many students have negative views of mathematics and these affective responses develop during the middle years of school The data for this book were collected with school students and students who were actually engaged in learning mathematics in their crucial middle school years The findings reported and discussed here are relevant for researchers and mathematics educators policy makers and curriculum developers and teachers and school principals engaged in the teaching of mathematics

HC 557 - Adult Literacy and Numeracy Great Britain: Parliament: House of Commons: Business, Innovation and Skills Committee, 2014-09-08 In light of an OECD survey of 24 countries ranking England and Northern Ireland 22nd for literacy and 21st for numeracy a more joined up Government approach is needed to tackle the alarmingly low levels of adult literacy and numeracy While the Government pledges free training and tuition for any adult who wishes to study English and maths up to and including GCSE level adults with the most limited skills were not aware of the support available There is little rigorous or uniform assessment in place for when adults claim unemployment benefit despite the fact that this is an ideal opportunity to help adults to gain essential skills needed to get a job The Department for Work and Pensions the Department for Business Innovation and Skills and Jobcentre Plus and skills providers should work closely to ensure there is consistent and thorough assessment of skills at the earliest possible stage of unemployment benefit claims The Committee urges a more flexible approach to adult learning both in the types of programme on offer and in the types of funding given by the Government There is also concern about reductions in funding to adult learning schemes and the Government is advised to reverse its decision to cut funding to Unionlearn a scheme which has achieved outstanding results at a fraction of the cost of full time formal education The Government should also move away from its preoccupation with GCSEs as the gold standard of measurement for adult skills as less linear and traditional learning schemes are often more effective

Extended Curriculum Programmes Tennyson Mgutshini, 2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa's key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study Even so this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness poor selection mechanisms in the identification of ECP students poor numeracy and literacy amongst students and indifferent teacher involvement in ECPs This volume offers a rare insight into

many of the above recognised challenges and in so doing provides critical matter for thought for educators within the higher education sector

Literacy in the Lives of Working-Class Adults in Australia Stephen Black, 2023-12-14 Adopting a social practice approach to literacy research based on ethnographic methods this book provides a strong critique of dominant understandings of the role of literacy in the lives of adults in Australia It explores how groups of working class adults can manage the literacy practices of their everyday lives by drawing on social networks of support It is based on research conducted by the author over a forty year career in adult literacy education featuring the voices of varied adult groups including prisoners the long term unemployed local council workers manufacturing workers adult literacy students marginalised young people vocational students and patients living with a chronic illness type 2 diabetes Each chapter explains how dominant society views these adult groups in relation to literacy and provides a qualitative examination at the local level of how members of these groups manage the literacy practices of their everyday lives

Substance Misuse Prevention Program Attendance Marni L. Kan, Hsiu Chen Yeh, Lisa M. Schainker, Jessica Nelson, Samantha Charm, Cleve Redmond, Richard Spoth, 2022-12-19 Typical life circumstances for military families may impact their participation in prevention programs yet little is known about what factors influence their participation The current study examined predictors of attendance in the Strengthening Families Program For Parents and Youth 10 14 for Military Families a universal in person program designed to improve family functioning and reduce youth substance misuse and other problem behaviors Participants included 159 parent child dyads randomly selected to be offered the 7 week family program Analyses examined demographic characteristics deployment experiences time spent waiting for the program to begin and psychosocial functioning as predictors of attendance in a series of regression models Of the 39 percent of families that attended any program sessions the majority 71 percent attended at least four of the seven sessions Attendance varied significantly across the geographic areas in which groups were held Prior service utilization youth conduct problem behavior parental history of deployment and family conflict were each positively associated with attendance whereas parent tobacco use was negatively associated with attendance These results highlight the challenges in recruiting military families into in person prevention programs and suggest that extra efforts may be needed to engage families that do not perceive that they have a need for support

Teaching for Numeracy Across the Age Range Peter Stuart Westwood, 2021-08-10 This book provides an introduction to what it means to be numerate and how numeracy can best be developed and nurtured in children and in adults It also presents a cohesive coverage of numeracy development from early childhood to adulthood This book draws on international research and practice to provide a comprehensive overview on the topic It depicts and draws connections with the National Curriculum in the United Kingdom the Australian Curriculum and the Common Core State Standards in the United States This book identifies skills and concepts involved in achieving functional numeracy and provides practical advice on effective teaching learning and assessment It serves as a valuable guide to educators who teach mathematics in

primary and secondary schools but who are not specifically trained in the subject **Girls Have Academic Advantages and So Do Boys** Jodie Fonseca, Laiba Bahrawar, Margaret M. Dubeck, Yasmin Sitabkhan, Christopher Cummiskey, Devanshi Unadkat, 2023-05-15 This paper contains a new analysis of gender differences in early grade reading and mathematics outcomes in 19 USAID funded studies over the past decade from 14 locations in Africa Asia Latin America and the Middle East The paper addresses gaps in the literature related to learning patterns for girls and boys in lower and middle income countries and in early primary school We analyzed the results from reading and mathematics assessments in grades 2 and 3 including differences in oral reading fluency ORF and quantitative comparison scores between boys and girls as well as differences in score distributions by gender In line with results from assessments in upper grades and in wealthier countries we found that girls consistently outperformed boys in reading In mathematics boys slightly outperformed girls although the differences were typically not large Global experience has shown that patterns in poor performance become more entrenched the further learners progress through the grades suggesting that early interventions for boys in reading and girls in mathematics could have long term benefits At the same time both girls and boys typically score below expectations in the two subjects across countries necessitating targeted strategies to improve outcomes for both genders early in their educational trajectories Learning to Teach Mathematics in the Secondary School Sue Johnston-Wilder, Clare Lee, David
