Although the majority of these principles are provided by the OECD the views of other international organisations in particular the United Nations and the European Union are also taken into account. Moreover the book illustrates the fundamentals of transfer pricing with concrete examples based on the structures often used by multinational enterprises when conducting cross border business activities. Also included are relevant court cases from a variety of countries. Among the issues and topics covered are the following: the arm's length principle in theory and practice transfer pricing methods intercompany transactions involving intangibles and financial transactions common types of transfer pricing models cross border business restructurings the substance requirement for transfer pricing purposes attribution of profits to permanent establishments and the prevention and resolution of transfer pricing disputes. Today, roughly half of all global trade still passes through tax haven jurisdictions, costing millions in lost revenue to countries around the world. Such practices affect all of us but are most keenly felt by poorer people in developing countries where unfair tax practices have become a major obstacle to development and which have allowed multinational corporations to continue to exploit developing economies. This collection argues that for developing countries to achieve social justice and lasting prosperity, they must take control of their own tax destinies and that this will also be crucial to achieving the Sustainable Development Goals. Covering such topics as natural resource management, representation in global tax institutions and effective strategies for building and protecting tax bases, the collection brings together expertise from a variety of countries and disciplines. It explores the options available to developing countries and provides a basis for concerted action by tax authorities, policy makers, academics and civil society experts to design tax systems that can sustain a just society **THE AGEING OF GREAT BRITAIN** Martin Slattery, 2019-11-19 Great Britain is ageing but doesn't seem to know it. Despite numerous warnings from official reports, the Government has ignored or neglected the car crashes ahead. Our Health: the potential for a New Age manifesto that might propel ageing up the political agenda, create a new Intergenerational Social Contract and force the government to plan ahead for the 100 Year Life, now facing over a third of all children born today. If the Japanese, the Scandinavians and the Bolivians can do it, why not Great Britain? We owe that to our children and to the generations ahead. Welcome to the Ageing World of the 21st Century
