Globalisation and Education Policy

Reform in Botswana Richard Tabulawa, 2023-07-21 This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana's Independence in 1966 the book evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures The result of this interplay has been an education landscape that while reflecting globally circulating education discourses markedly differs from those same discourses The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future As the first book of its kind to delve into education in Botswana from a single authored critical lens the book will be a highly relevant reading for academics researchers and post graduate students of African education comparative education education policy and curriculum studies

Pathways to Prosperity in Rural Malawi Andrew Dabalen,Alejandro de la Fuente,Aparajita Goyal,Wendy Karamba,Tomomi Tanaka,2017-07-06 By most accounts rural Malawi has lacked dynamism in the past decade Growth has been mostly volatile in large part due to unstable macroeconomic fundamentals evidenced by high inflation fiscal deficits and interest rates When rapid economic growth has materialized the gains have not always reached the poorest Poverty remains

high and the rural poor face significant challenges in consistently securing enough food. Several factors contribute to stubbornly high rural poverty. They include a low productivity and non-diversified agriculture, macroeconomic and recurrent climatic shocks, limited non-farm opportunities, and low returns to such activities, especially for the poor. The Report proposes complementary policy actions that offer a possible path for a more dynamic and prosperous rural economy. The key pillars of this comprise macroeconomic stability, increased productivity in agriculture, faster urbanization, better functioning safety nets, and more inclusive financial markets. Some recommendations call for a reorientation of existing programs such as the Malawi Farm Input Subsidy Program (FISP) and the Malawi Social Action Fund Public Works Program (MASAF PWP). Others identify promising new areas of intervention such as the introduction of digital IDs and biometric technologies to enhance the reach of mobile banking and deepen financial inclusion. Finally, and importantly, the report recommends the scaling up of investments on girls' secondary education to curb early child marriage and early child bearing among adolescents. This will empower women at home and work and bend the trajectory of fertility rates in rural areas in order to boost human development and reduce poverty.
