The African Mother Tongue and Mathematical Ideas Abdul Karim Bangura,2020-06-02 This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa s development efforts Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics However scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks This is highlighted by one of the most compelling arguments in the book which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer showing that even if there is a great body of work connecting linguistics and mathematics few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics Thus the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common Next since the object of study of linguistics is language the nine design features of language are employed to examine each of the objects as it pertains to African languages After that mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa s development efforts

African Edible Insects As Alternative Source of Food, Oil, Protein and Bioactive Components Abdalbasit Adam Mariod,2020-01-10 The harvesting processing and consumption of edible insects is one of the main keys to the sustainability of food chains on the African continent Insects are the largest and most successful group of animals on the planet and it is estimated that they comprise 80% of all animals This makes edible insects extremely important to the future survival of large populations across Africa and the world Insects offer a complete animal protein that includes all 9 essential amino acids and are very competitive with other protein sources They are also a good source of beneficial unsaturated fats and many insects have a perfect Omega 3 6 balance African Edible Insects As Alternative Source

of Food Oil Protein and Bioactive Components comprehensively outlines the importance of edible insects as food and animal feed and the processing of insects in Africa The text also highlights indigenous knowledge of edible insects and shows the composition and nutritional value of these insects plus presents reviews of current research and developments in this rapidly expanding field All of the main types of edible insects are covered including their nutritional value chemical makeup and harvesting and processing details The various preparation technologies are covered for each insect as are their individual sensory qualities and safety aspects A key aspect of this work is its focus on the role of insects in edible oils and gelatins Individual chapters focus on entomophagy in Africa and the various key aspects of the continent s growing edible insect consumption market As it becomes increasingly clear that the consumption of insects will play a major role in the sustainability of food chains in Africa this work can be used as a comprehensive and up to date singular source for researchers looking for a complete overview on this crucial topic

The Work of Repair Thomas Cousins, 2023-06-06 In the timber plantations in northeastern South Africa laborers work long hours among tall swaying lines of eucalypts on land once theirs In 2008 at the height of the HIV AIDS crisis timber corporations distributed hot cooked meals as a nutrition intervention to bolster falling productivity and profits But life and sustenance are about much more than calories and machinic bodies What is at stake is the nurturing of capacity across all domains of life physical relational cosmological in the form of amandla An Nguni word meaning power strength or capacity amandla organizes ordinary concerns with one s abilities to earn a wage to strengthen one s body and to take care of others it describes the potency of medicines and sexual vitality and it captures a history of anti colonial and anti apartheid struggle for freedom The ordinary actions coordinated by and directed at amandla do not obscure the wounding effects of plantation labor or the long history of racial oppression but rather form the basis of what the Algerian artist Kader Attia calls repair In this captivating ethnography Cousins examines how amandla as the primary material of the work of repair anchors ordinary scenes of living and working in and around the plantations As a space of exploitation that enables the global paper and packaging industry to extract labor power the plantation depends on the availability of creative action in ordinary life to capitalize on bodily capacity The Work of Repair is a fine grained exploration of the relationships between laborers in the timber plantations of KwaZulu Natal and the historical decompositions and reinventions of the milieu of those livelihoods and lives Offering a fresh approach to the existential ethical and political stakes of ethnography from and of late liberal South Africa the book attends to urgent questions of postapartheid life the fate of employment the role of the state in providing welfare and access to treatment the regulation of popular curatives the queering of kinship and the future of custom and its territories Through detailed descriptions Cousins explicates the important and fragile techniques that constitute the work of repair the effort to augment one s capacity in a way that draws on acknowledges and reimagines the wounds of history keeping open the possibility of a future through and with others

The Cultural and Artistic Legacy of Oliver Mtukudzi Munyaradzi Nyakudya,Bridget Chinouriri,Pauline Mateveke,Ezra Chitando,2022-09-10 This book delves into a

critical and comprehensive analysis of Mtukudzi's legacy as an outstanding musician who anchored his music on cultural identity specifically through the artistic manipulation of language. As a cultural worker, his remit extended beyond performance. This raised his stature to the levels of such African music icons as Fela Kuti of Nigeria, Salif Keita of Mali, and Miriam Makeba. Hugh Masekela of South Africa, all towering giants in African musical performance. This volume examines how Mtukudzi artistically manipulated language to convey a timeless message of cultural identity, fighting for the respect of rights for women, children, and all. It unpacks how Mtukudzi subtly uses language to put across political views that speak truth to power, harnessing Zimbabwean language to articulate and promote the nation's cultural heritage and to advocate for societal development and the promotion of rights of vulnerable groups. The chapters in this volume are a mix of interdisciplinary Zimbabwean scholars of linguistics, performance studies, religion, history, communication, and media studies, unravelling Mtukudzi as a fighter for human rights and justice who subtly critiqued political systems and practices. It concludes that Mtukudzi strove to be a cultural worker who used the power of language through music to contribute towards the rehabilitation of a battered African identity.

Rhinos of the World Mario Melletti, Bibhab Talukdar, David

Balfour, 2025-02-20. This book represents the culmination of more than four years of work by many rhino experts primarily from Africa, Asia, the United States, and Europe involved in rhino conservation research and management. It is one of the most comprehensive reference works ever published on the systematics, ecology, conservation status, and management of all rhinoceros species. Covering all five rhino species worldwide, this volume brings together the contributions of 92 international rhino experts and provides a comprehensive overview of the current state of knowledge on the evolution, phylogeny, systematics, and fossil record of rhinos. An in-depth look at the ecology and conservation status of each species with detailed chapters, a series of case studies on conservation management, poaching, horn trade, and ex situ programs. This beautifully illustrated book is an invaluable resource for researchers, wildlife managers, and professionals in conservation biology, ecology, and management, as well as the general public. It reveals the fascinating story of rhino evolution, the long history of human interactions with rhinos, and the major threats to these iconic species.
