2014 November English Paper3 Grade 10 Scope:

Chinese Law: Context and Transformation Jianfu Chen, 2015-12-04 China has changed and the continuing changes have not just been about economic development. Among the many transformations there has been another quiet peaceful and largely successful but far from perfect revolution in the area of law whose deficiencies have been more often mercilessly examined and documented than have its historical achievements and significance. This legal revolution is the subject matter of the present book. Like the previous edition in 2008 it examines the historical and politico economic context in which Chinese law has developed and transformed focusing on the underlying factors and justifications for the changes. It attempts to sketch the main trends in legal modernisation in China offering an outline of the principal features of contemporary Chinese law and a clearer understanding of its nature from a developmental perspective. It provides comprehensive coverage of topics: legal culture and modern law reform; constitutional law; legal institutions; law making; administrative law; criminal law; criminal procedure; law civil law; property family law; contracts; torts; law on business entities; securities; bankruptcy; intellectual property; law on foreign investment and trade; Chinese investment overseas; dispute settlement and implementation of law. Fully revised, updated and considerably expanded, this edition of Chinese Law: Context and Transformation is a valuable and important resource for researchers, policy makers and teachers alike.

Consumer Involvement in Private EU Competition Law Enforcement Maria Ioannidou, 2015-09-03 Despite the growing importance of consumer welfare in EU competition law debates, there remains a significant disconnect between rhetoric and reality as consumers and their interests still play only an ancillary role in this area of law. Consumer Involvement in Private EU Competition Law Enforcement is the first monograph to exclusively address this highly topical and much debated subject, providing a timely and wide ranging examination of the need for more active consumer participation in competition law. Written by an expert in the field, it sets out a comprehensive framework of policy implications and arguments for greater involvement, positioning the debate in the context of a broader EU law perspective. It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment. Finally, the book identifies key institutional and political obstacles to the adoption of effective measures and suggests alternative routes to enhance the role of consumers in private competition law enforcement. The book's innovative approach, combining normative analysis and practical solutions, make it invaluable for academics, policy makers and practitioners in the field.

Growth, Crisis, Democracy Hideko Magara, Bruno Amable, 2017-07-14 Since the global financial crisis of 2008, advanced economies have been making various efforts to overcome the economic impasse. While the contrast between the countries that have escaped from the crisis relatively quickly and those still suffering from serious problems is becoming clearer, a new economic crisis stemming from newly emerging economies has again impacted advanced economies. In retrospect, both leftist and rightist governments in advanced economies pursued expansive macroeconomic and welfare policies from the post WWII period to the oil shocks of

the 1970s While we recognise that the particular policy regime in this Golden Decades during which the left and the right implemented similar policies cross nationally were characterised by outstanding economic growth in each country the specific growth patterns varied across countries Different social coalitions underpinned different growth models This book is premised on tentative conclusions that Magara and her research collaborators have reached as a result of three years of study related to our previous project on economic crises and policy regimes Recognising the need to analyse fluid and unstable situations we have set up a new research design in which we emphasise political variables whether political leaders and citizens can overcome the various weaknesses inherent in democracy and escape from an economic crisis by establishing an effective social coalition A new policy regime can be stable only if it is supported by a sufficiently large coalition of social groups whose most important policy demands are satisfied within the new policy regime
