Innovation in the Asia Pacific Thomas Clarke, Keun Lee, 2017-10-20 This book promotes the creation of advanced knowledge-based economies driven by innovation networks and the continuous development of human capital and capability. It provides valuable insights into the growing emergence of knowledge-based industries of the Asia Pacific and highlights research on modes of creativity and innovation, intellectual property, the components of national innovation systems such as firms, education and training, knowledge and technical infrastructure and public policy. The Asia Pacific region is currently in the process of transforming from being the manufacturing centre of the global economy to a centre of innovation for the knowledge economy with the successful IPO of Alibaba in 2014 being a prime example of this shift. From a neo-Schumpeterian perspective, the region is increasingly engaged in shortening and intensifying cycles of innovation. The historic agreement at the Beijing APEC meeting between China and the US to radically reduce carbon emissions indicates that one imperative of this innovation is to contribute to sustainability. The fact that the US Government is moving away from this historic commitment while the Chinese Government is endorsing the commitment indicates an emerging opportunity for Asia to lead the world technologically in a vital industrial sector of the future.

The Chinese Shadow on India's Eastward Engagement Sanjay K. Bhardwaj, 2021-07-12 India, one of the largest importers of oil in the world, has been diversifying its energy resource options and moving towards greater energy security. This book analyses India's potential for building energy ties in the Asia Pacific, considering the global and regional power politics. Facing China's growing influence in Asia, India's eastward engagement with its extended neighbours has been entrenched in its Act East Policy and institutional commitments towards Southeast Asia. This volume focuses on diverse facets of energy security beyond the traditional understanding of demand and supply and price and stability. It examines India's energy sector, its dependence on hydrocarbons and the push towards renewable and alternate energy resources. It further looks at the strategic importance of the Indian Ocean and South China Sea regions in geopolitical negotiations from an energy perspective and how China's influence in the region will affect India's moves towards greater energy cooperation with the countries of East Asia. With contributions by leading experts, the volume seeks to fill a major void in this theme and cater to the needs of a variety of audiences including academics, policymakers and experts in international relations, geopolitics and geoeconomics and

professionals in the field of energy studies The Global Commercial Aviation Industry Sören Eriksson,Harm-Jan Steenhuis,2015-07-16 This book provides a state of the art overview of the changes and development of the civil international aircraft aviation industry It offers a fully up to date account of the international developments and structure in the aircraft and aviation industries from a number of perspectives which include economic geographical political and technological points of view The aircraft industry is characterized by very complex high technology products produced in relatively small quantities The high technology requirements necessitate a high level of R D In no other industry is it more of inter dependence and cross fertilisation of advanced technology Consequently most of the world s large aircraft companies and technology leaders have been located in Europe and North America During the last few decades many developing countries have tried to build up an internationally competitive aircraft industry The authors study a number of important issues including the political economy of the aircraft industry globalization in this industry innovation newly industrializing economies and the aircraft industry This book also explores regional and large aircraft transformation of the aviation industry in Central and Eastern Europe including engines airlines airports and airline safety It will be of great value to students and to researchers seeking information on the aircraft industry and its development in different regions
