Egan,2015 This ambitious volume provides a trenchant and timely analysis of the creation of a single market in both the EU and the US Comparing the experience of the US during the nineteenth century and the single market of the EU in the twentieth century *Single Markets* demonstrates how the political economy of single market formation has followed remarkably similar trajectories Both cases show evidence of interplay between different levels of government in determining distributive outcomes evolution of a legal framework for the market and development of new regulatory strategies to deal with changing economic realities The book illustrates the process of market consolidation through a detailed comparison of the so called four freedoms the removal of border controls and the largely unrestricted transfer of goods services and capital across different jurisdictions In both cases establishing one market one currency and a more unified banking and financial system transformed largely autonomous or sovereign constituent units into a more unified

economic entity Single Markets also sheds light on critically important questions for both comparativists and international relations scholars regarding the nature of territorial governance and the construction of state interests The book s interdisciplinary approach to focusing on crucial political and economic developments on both sides of the Atlantic will be of interest to scholars in political science public policy law and history *Principles of Institutional and Evolutionary Political Economy* Phillip Anthony O'Hara,2022-08-29 This is the very first book to explicitly both detail the core general principles of institutional and evolutionary political economy and also apply the principles to current world problems such as the coronavirus crisis climate change corruption AI Robotics policy governance money and financial instability terrorism AIDS HIV and the nurturance gap No other book has ever detailed explicitly such core principles and concepts nor ever applied them explicitly to numerous current major problems The core general principles and concepts in this book which are outlined and detailed include historical specificity hegemony circular heterogeneous groups contradiction uncertainty innovation and policy as well as a Presidential address to the Association for Evolutionary Economics AFEE on corruption The structure of the book starts with two chapters on the principles of institutional and evolutionary political economy firstly their history and secondly a chapter on the contemporary nature of the principles and concepts This is followed by nine chapters applying some of the core principles to current world problems such as the coronacrisis climate change corruption AI robotics policy money financial instability terrorism HIV AIDS and the nurturance gap The book finishes with a conclusion a glossary of major terms and an index The author s principles are well established in the literature and this book provides a detailed exposition of them and their application **The Rise and Fall of Neoliberal Rentier Capitalism** Luiz Carlos Bresser-Pereira,2025-02-10 The Rise and Fall of Neoliberal Rentier Capitalism is an account of the political economy of capitalism in the 20th and 21st centuries Capitalism is an unjust form of economic organisation it is a culture of exacerbated individualism justified by the glorification of individual competition Today after 40 years of neoliberalism capitalism faces again a legitimization crisis The book discusses capitalism after two revolutions the Organisational Revolution and the Democratic Revolution It views capitalism since the New Deal in the US and the post war as a progressive and developmental era and the Neoliberal Turn as the change from social democracy to radical and regressive global neoliberalism which was a regressive time for almost forty years In the Neoliberal Years rentiers replaced entrepreneurs in the command of the economy and called on the financiers to manage their wealth and serve as organic intellectuals and both mounted an attack to the state which is the main capitalist institution The global crisis and in 2020 the Covid pandemic showed that the state remains the nations resource of last instance The transition of China from statism to an active developmentalism resulted in an extraordinary growth Given such realities in 2021 we saw the collapse of neoliberalism and in the United States a Developmental Turn the state is back in the economy The transition phase we live in is characterised by three main forces economic liberalism managerialism and democracy Economic liberalism is the great defeated managerialism became

powerful and is developmental and democracy is the stronger force It was attacked by neoliberalism and is now being attacked by right wing populism but resisted and resists brilliantly proving that it was a conquest of the popular classes that became a universal value counting on the support of all social classes **Handbook on the Economics of the Internet**
