The age of print was begun by Johannes Gutenberg in 1440 in Mainz Germany His invention of the mechanized and mass production of print replaced the previous handwriting of the scribes and was a transformative achievement It was both the product of and a catalyst for far reaching intellectual social and political changes that began during the Renaissance and continued for centuries right up to the present The age of electronic media was begun by Steve Jobs in 1985 in Cupertino California His integration of the elements of desktop publishing personal computer page layout software page description language and laser printer replaced the previous photomechanical processes of printing and was a transformative achievement It was both the product of and a catalyst for the intellectual social and political changes during the digital revolution that will extend for generations into the future This book discusses these two bookends in the age of print It follows the transitions and stages of innovation in printing between the fifteenth and twenty first centuries and shows how the inventors responsible for this progress are bound together in a chain of revolutionary technical change called disruptive continuity While the works of Gutenberg and Jobs are separated by more than five centuries there are striking parallels and differences between these two innovations They both sparked the quantitative expansion of literacy and the spread of knowledge around the world However the emergence of electronic publishing especially in its present day social media forms has brought a vast increase in the consumption of information while also heralding a qualitative transformation that places the tools of wireless and mobile multimedia publishing into the hands of billions of people on earth Much in the same way that there was a historical lag between Gutenberg s invention and the full impact of printing on the world so too in our own time the long term societal consequences of electronic publishing have yet to be realized

What Is Your Quest? Anastasia Salter,2014-11-01 What Is Your Quest examines the future of electronic literature in a world where tablets and e readers are becoming as common as printed books and where fans are blurring the distinction between reader and author The construction of new ways of storytelling is already underway it is happening on the edges of the mainstream gaming industry and in the spaces between media on the foundations set by classic games Along these margins convergent storytelling allows for playful reading and reading becomes a strategy of play One of the earliest models for this new way of telling stories was the adventure game the kind of game centered on quests in which the characters must overcome obstacles and puzzles After they fell out of fashion in the 1990s fans made strenuous efforts to keep them alive and to create new games in the genre Such activities highlight both the convergence of game and story and the collapsing distinction between reader and author Continually defying the forces of obsolescence fans return abandoned games to a playable state and treat stories as ever evolving narratives Similarly players of massive multiplayer games become co creators of the game experience building characters and creating social networks that recombine a reading and gaming community The interactions between storytellers and readers between programmers and creators and among fans turned world builders are essential to the development of innovative ways of telling stories And at the same time that fan activities foster the convergence of digital gaming and storytelling new and increasingly accessible tools and models for interactive narrative empower a broadening range of storytellers It is precisely this interactivity among a range of users surrounding these new platforms that is radically reshaping both e books and games and those who read and play with them

Schöne neue Medienwelt Wolfgang Pensold,2023-06-12 Unter einer schon neuen neuen Medienwelt hat eine technikaffine Menschheit im ausgehenden 20 Jahrhundert die Vision einer digitalisierten Gesellschaft verstanden die dem Einzelnen vielfältige Möglichkeiten erschließen würde Jahrzehnte später blickt man erneut auf die Entwicklungen zurück die nicht nur Fortschritt gebracht haben Das Buch Schöne neue Medienwelt beschreibt die Wandlung die das moderne Mediensystem seit Beginn des digitalen Zeitalters durchmacht Der Bogen spannt sich dabei von der Einführung des PCs über die Verbreitung des Internets

und des Smartphones bis zu den zahlreichen Anwendungen die in den 2000er Jahren möglich werden Pensold führt den Diskurs weit ins Feld der Möglichkeiten und Probleme die sich daraus ergeben Er erzählt vom Menschen der sich als Prothesengott endgültig über die Beschränkungen von Raum und Zeit hinwegsetzt und sich allerlei Annehmlichkeiten in der Sekunde verfügbar macht der seinen Alltag im Sinne der Sharing Philosophie mit dem Internet teilt und sich die Welt dadurch untertan zu machen hofft Es ist auch eine Geschichte unerwünschter Geister die sich einmal gerufen nicht mehr vertreiben lassen die Geschichte einer durch Verschwundungslegenden bedrohten Wahrheit einer durch Hass Hetze und Extremismus bedrohten Demokratie und eines Kontrollverlusts der sich in der Machtübernahme Künstlicher Intelligenz anzukündigen scheint

Time, 2010 *Why Study Literature?* Jan Alber, Kraglund, Rikke Andersen Kraglund, Stefan Iversen, Louise Brix Jacobsen, Reestorff, Camilla Møhring Reestorff, Nielsen, Henrik Skov Nielsen, 2011-10-11 This book presents new ways of thinking about the historical epistemological and institutional role of literature and aims at providing a theoretically well founded basis for what might otherwise be considered a relatively unfounded historical fact i.e. that both literature and the teaching of literature hold a privileged position in many educational institutions The contributors take their point of departure in the title of the volume and use narratological historical cognitive rhetorical postcolonial and political frameworks to pursue two separate but not necessarily related questions Why literature and Why study This collection brings together theoretical studies and critical analyses on literature as a medium among and compared to other media and includes essays on the physical and mental geography of literature focusing on the consequences and values of its reading and studying
